## **Activity Guide: Term 3**

The Grade R Mathematics and Language Improvement Project is an initiative of the **Gauteng Department of Education** and its key partner, the **Gauteng Education Development Trust**.

The development and production of the training and classroom resources for the Grade R Mathematics and Language Improvement Project were made possible by generous project funding from the **United States Agency for International Development** and the **Zenex Foundation**.

The Grade R Mathematics and Language Improvement Project is managed by **JET Education Services** with **UCT's Schools Development Unit** and **Wordworks** as technical partners.

The **Schools Development Unit** (SDU) at the **University of Cape Town** (UCT) is the mathematics technical partner to the Grade R Mathematics and Language Improvement Project. The SDU is a unit within UCT's School of Education that focuses on teachers' professional development in Mathematics, Science, Literacy/Language and Life Skills from Grade R to Grade 12. The SDU offers teacher qualifications and approved UCT short courses, school-based work, materials development and research to support teaching and learning in all South African contexts.

This edition of the mathematics materials has benefitted from collegial engagement with Wordworks colleagues and has been improved by their alignment with the materials of the Language Improvement Programme. It has been enriched by the work of officials of the Gauteng Department of Education's Early Childhood Development and Foundation Phase Curriculum Sub-Directorates at District and Provincial level who have made valuable contributions to the content of the materials and engaged constructively to ensure alignment with provincial policies, practices and values.

# Introduction

The Grade R Mathematics Improvement Programme (Grade R Maths) is based on a good knowledge of mathematics, an understanding of the progression in the Grade R curriculum, and a realisation that some teaching approaches are better suited to promote particular learning and outcomes.

The Grade R Maths *Activity Guide: Term 3* offers a structure for teaching maths in the third term of Grade R by:

- sequencing the content of each Mathematics Content Area across ten weeks
- providing progression and pacing within the five Content Areas
- focusing on one main Content Area per week (However, topics from other Content Areas may be introduced and practised during that week. Number-related learning and teaching takes place every day and is integrated into all the Content Areas.)
- suggesting activities for whole class, teacher-guided and independent group work.

## Features of Activity Guide: Term 3

The following features form part of *Activity Guide: Term 3*:

- A content overview shows the new knowledge and practice focus per week.
- Term, week and Content Area Focus are clearly stated at the beginning of each week.
- Topics, New knowledge and Practise boxes show what will be covered in the week.
- New maths vocabulary to be taught is listed per week.

<b>New maths vocabulary</b>		
seven	as many as	difference between

- A list is given of what you need to prepare for each week.
- Tip boxes give ideas and reminders.
- Integration boxes suggest how the maths can be reinforced in other subjects and daily activities during the Grade R daily programme.
- ‘Check that learners are able to’ boxes guide observation and continuous assessment.
- A continuous assessment page is based on the term’s activities.
- Resources and templates are included at the back of the guide.

## Grade R Maths in the daily programme

Routine is important and learners enjoy the repetition and feel secure when they know what to do and what is expected of them.

Planning is also important to ensure that the routine runs smoothly. Read the contents for the week and prepare all the materials you will need for each day in advance. Set out the materials for the day beforehand so that everything is ready in the morning.

Grade R Maths suggests a sequence of activities that are repeated daily over a five-day week. Classroom organisation and activities that can be used to teach and reinforce maths concepts are suggested per week. These include:

# Matseno

## Whole class activities per day

- Rhyme or song
- Oral counting
- Counting concrete objects
- Activities and questions linked to Content Area topics

At the end of the whole class activity, show the learners what they will be required to do at their workstations. All the materials they need should be set out so that they can begin working on the activities.

## Transitions: moving between activities

Moving between the mat and the workstations is a great time to practise rhythmic counting and fun, creative ways to move, for example, slowly like tortoises, hopping like rabbits, quietly like mice, one by one with their name/picture symbol cards.

## Small group activities

- There is one teacher-guided activity per day.
- There are four small group activities per day. These four independent activities (or side activities) should be set out at four **workstations** around the classroom – either at tables where the learners are seated or stand, or on the mat, or outside. The groups rotate to each **workstation** over the course of a week, depending on how the teacher has planned the activities. Remind learners to take turns, share materials and help each other while working.

## Tidy-up time

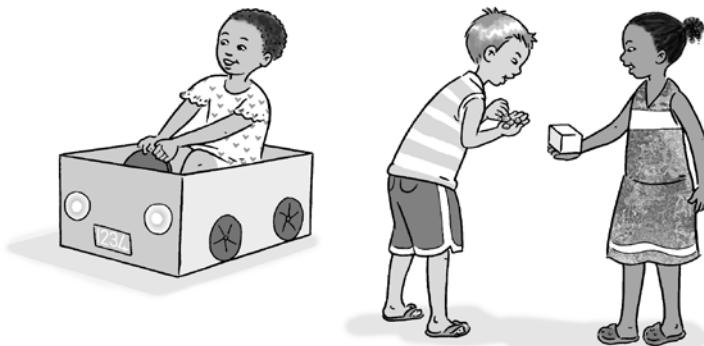

Learners need to know where materials belong. A shelf or table that is dedicated to maths equipment will help learners to be organised. Encourage learners to help each other during tidy-up time. Initially learners will need assistance and you will have to remind them where to put things, but they will soon get into the routine of putting things where they belong.

Choose group leaders and tidy-helpers each week. Give them specific tasks and responsibilities.

## Free choice activities

Set out creative, interesting activities that learners can choose from once they have completed their workstation activity. These could include:

- blocks or other construction toys
- puzzles
- playdough
- books in the reading corner
- fantasy play, for example, shopping
- workbook or worksheet pages.

## Ditirwana tsa phaposiborutelo yotlhe ka letsatsi

- Morumo kgotsa pina
- Go balela kwa godimo
- Go bala dilo tse di bonalang

- sekhutlo sa dibuka
- motshameko wa maitlhomo, sekao, go reka
- bukatiro kgotsa ditsebe tsa matharetiro.

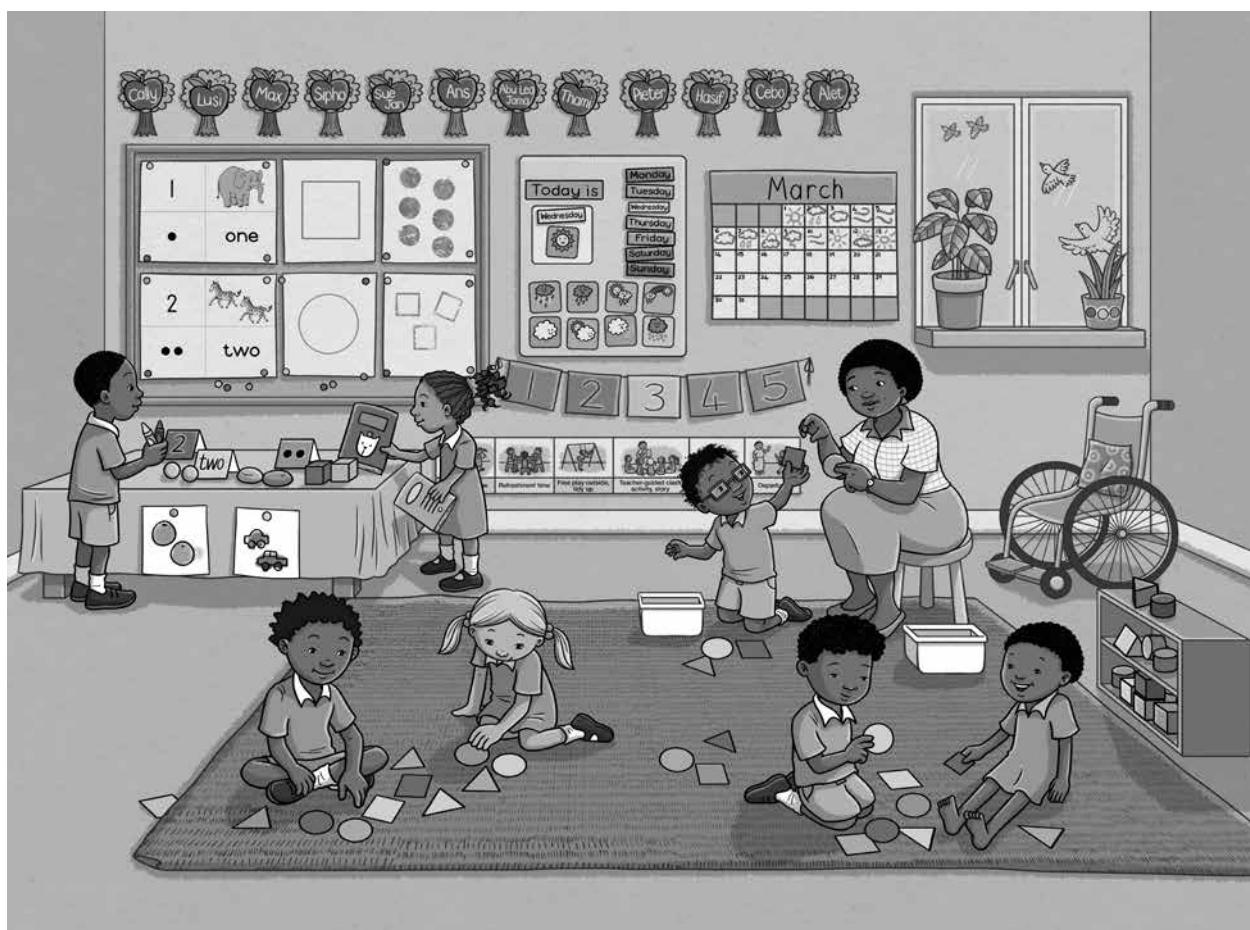

## Assessment

Observation and continuous assessment during teacher-guided and whole class activities provides opportunities for insights into and a good overview of each learner's progress. This information is important for guiding further teaching and interventions for individual learners. The continuous assessment checklist on pages 186 and 188 of this guide is based on the content that has been taught in Term 3. This template can be used to record each learner's progress during the term.

## Grade R Maths in the classroom

Set up an area in the classroom that is dedicated to maths and is near the mat. This is a shared space where learners can contribute to and engage with the topic they are learning about. An ideal maths area will include:

- small table against a wall
- number line made with string and pegs
- daily weather chart
- calendar for each month with blocks for each day
- chart with the names of the days of the week
- daily programme with pictures for the different activities
- learners' name cards and symbols arranged according to their group names
- helpers' symbols to move between learners' names according to each day of the week
- helpers' chart.

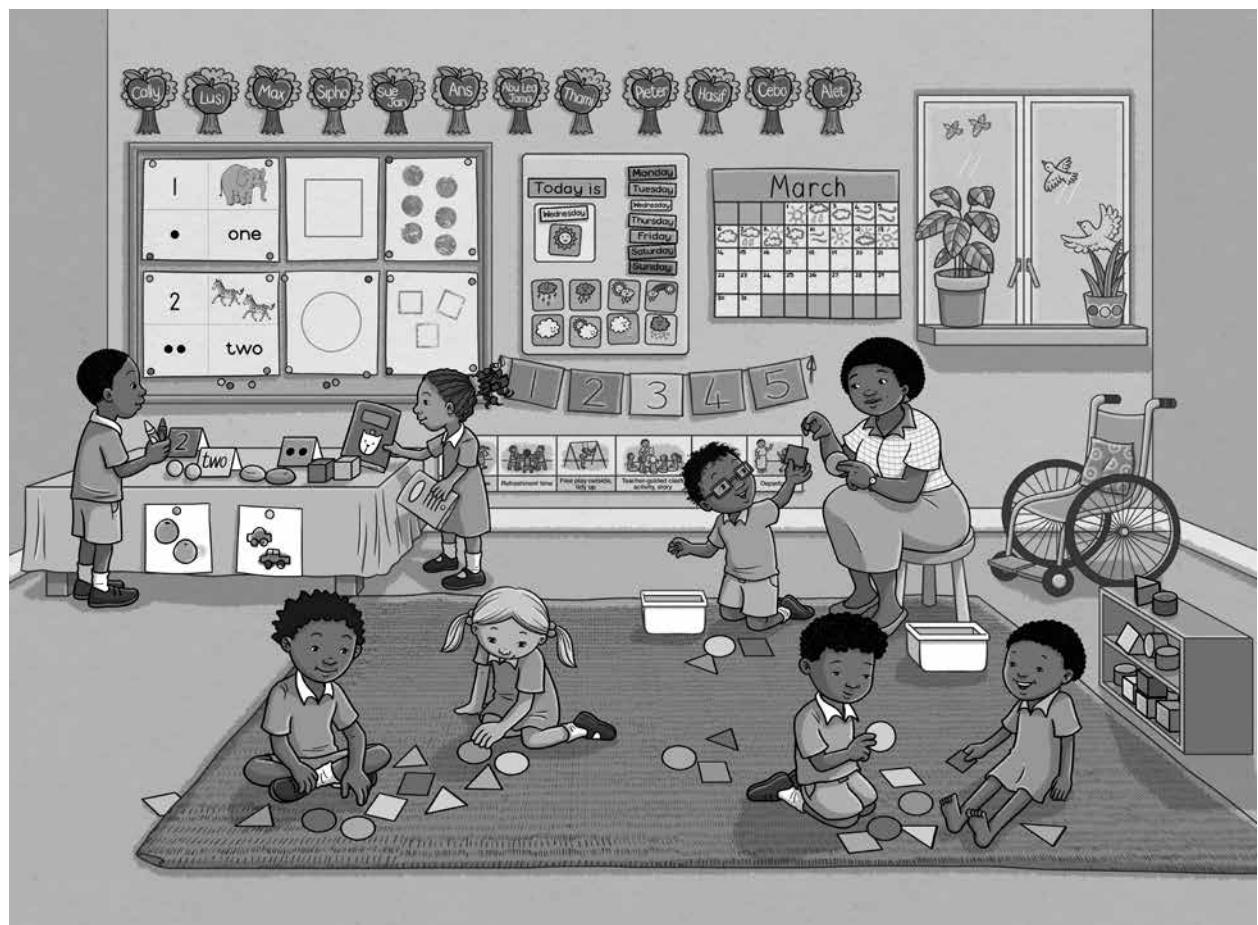

## Tlhatlhobo

Kelothoko le tlhatlhobotsweledi ka nako ya ditirwana tse di mo kaelong ya morutabana mmogo le tsa phaposiborutelo yotho di neelana ka ditshono tsa go lemoga le go thadisa tswelelopele ya morutwana mongwe le mongwe. Tshedimosetso eno e botlhokwa go ka kaela thuto mmogo le ditseleganyo tsa morutwana ka nosi. Lenanenetefatso la tlhatlhobotsweledi mo ditsebeng 187 le 189 ya kaedi eno le ikaegile ka diteng tse di rutilweng mo Kgweditharong ya 3. Thempoleiti eno e ka dirisiwa go rekota tswelelopele ya morutwana mongwe le mongwe mo kgweditharong.

## Grade R Maths mo phaposiborutelong

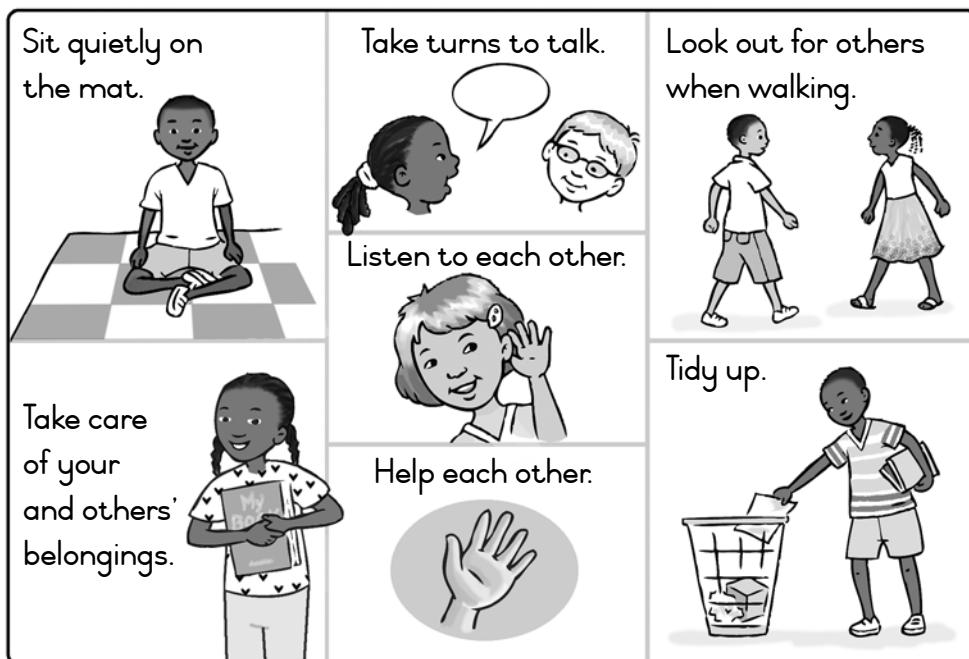

Baakanyetsa thuto ya dipalo lefelo mo phaposiborutelong mme e bile le le gaufi le mmetshe. Seno ke sebaka se se dirisiwang mmogo moo barutwana ba ka inaakanyang le setlhogo se ba ithutang ka ga sona mmogo le go nna le seabe. Sebaka sa dipalo se tlaa akaretsa:

- tafojana e e ikaegileng ka lobota
- molapalo o o dirilweng ka megala le diphekese
- tšhate ya maemo a bosa a letsatsi le letsatsi
- khalendara ya kgwedi e nngwe le e nngwe e na le diboloko tsa letsatsi le letsatsi

- matshwaoina a bathusi go tsamaya magareng ga barutwana go ya ka letsatsi lengwe le lengwe la beke
- tšhate ya bathusi.

Make a ‘classroom rules’ poster with the learners. Display it where they can easily see it. There should be no more than six or seven rules.

## Resources for Grade R Maths

### Grade R Maths Resource Kit

Grade R Maths provides a kit for learning and teaching maths that provides apparatus for a small group of six to eight learners to use. The kit includes the following items:

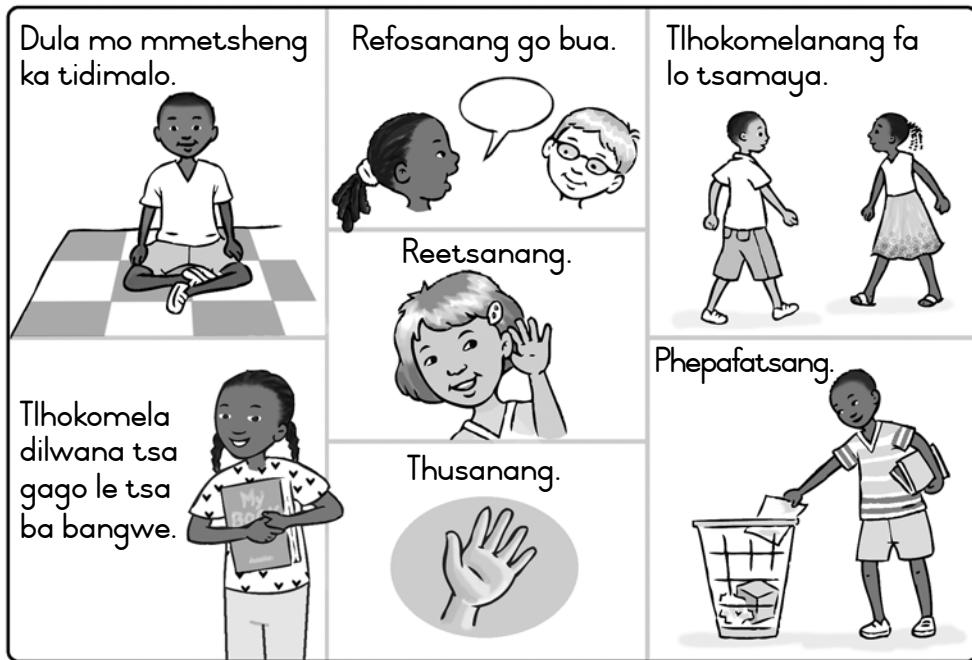

- counting materials, for example, coloured discs and sticks, fruit and animal counters, Unifix blocks
- jumbo dice
- strings of ten structure beads
- dot cards
- number cards: number symbols (0–10) and number words (zero–ten)
- attribute blocks.

These should not be the only resources that teachers and learners use during maths activities. Everyday objects from home are ideal for sorting, counting and exploring shapes.

Dira phousetara ya 'melawana ya phaposiborutelo' le barutwana. E beye moo ba ka e bonang bonolo gona. Melawana e seka ya feta supa ka palo.

## Melawana ya phaposiborutelo ya rona

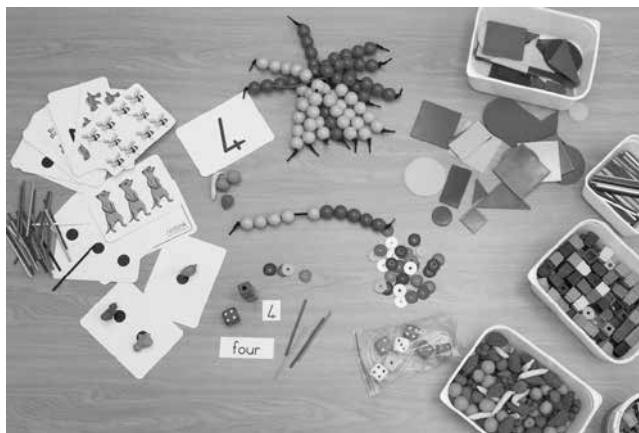

## Didiriswa tsa Grade R Maths

### Kgetsana ya Didiriswa tsa Grade R Maths

Grade R Maths di tlamela barutwana ka kgetsana ya didiriswa tsa go rutiwa le go ithuta dipalo moo go neelwang dilwana tse di ka dirisiwang ke setlhophya se sennye sa barutwana ba ka nna thataro kana robedi. Kgetsana e akaretsa dilwana tse di latelang:

- dilo tsa go bala, sk. didisiki tse di mmalafaditsweng le dithobane, dibalamaungo le diphologolo, le dibolokogokgedi
- letaese la jambo
- megala ya dibagapopego di le lesome
- dikaratarontho
- dikaratapalo: matshwaopalo (0–10) le mafokopalo (lefela–lesome)
- dibolokoponagalo.

Tseno ga di a tshwanelo gore e bo e le tsona fela didiriswa tse barutabana le barutwana ba di dirisang ka nako ya ditirwana tsa dipalo. Dilwana tse di dirisiwang letsatsi le letsatsi kwa gae di ka dirisetwa go latedisanya, go bala le go ithuta dipopego.

## Recycled materials

Store recycled materials in labelled containers with lids (such as: fruit and vegetable packaging, 2-litre ice-cream containers and 500-ml feta tubs). Place the containers on a shelf or somewhere that the learners can reach. Encourage learners to put the objects away during tidy-up time if they have used them at their workstations or during free choice activities. Here are some ideas for maths resources:

- bottle caps and lids (different shapes, sizes and colours)
- different-sized boxes (toothpaste, matchbox, cereal, medicine, packaging)
- plastic containers (500-ml and 1-litre bottles, margarine tubs, 250-ml and 500-ml yoghurt tubs, ice-cream containers, vegetable packaging)
- tubes and cylinders (cardboard toilet roll inners, paper towel inners, foil roll inners, tins)
- egg boxes
- buttons, old keys, plastic spoons, ice-cream sticks, bread packet tags
- variety of balls, beanbags, hula hoops.

## Other resources

Other useful classroom resources for Grade R Maths teaching include:

- crayons, paint, glue, scissors
- playdough or modelling clay
- books that can be used for maths discussions
- building blocks and construction toys (collect wood offcuts if necessary)

## The Grade R Maths Poster Book

There are eleven posters in the Grade R Maths Poster Book. The posters present familiar contexts that learners can relate to that capture some aspect of maths, for example, in the classroom, on the playground, and in the kitchen. The posters are intended to stimulate interest and discussion on maths topics, including: number, patterns, space and shape, sequencing of time and measurement. The posters can be used to engage learners in critical thinking and reasoning. They are perfect for developing problem-solving skills and for maths investigations.

Teachers can encourage learners to discuss the posters and share their thinking by asking questions to guide them in focusing on a particular aspect of the poster, for example:

- What do you see in the picture?
- Where do you think the children/people are?
- What is happening in the picture?
- Can you tell me a story about the picture?
- How many ... can you see? What if there was one more/fewer ...?
- Where is the ...?
- What would happen if ...?
- What do you think will happen next?
- What do you think ... can see from where they are standing?
- What pattern can you see? Describe the pattern.
- What shapes can you see?
- Which ... is the tallest/shortest?
- Can you use any maths words to describe something in the picture?

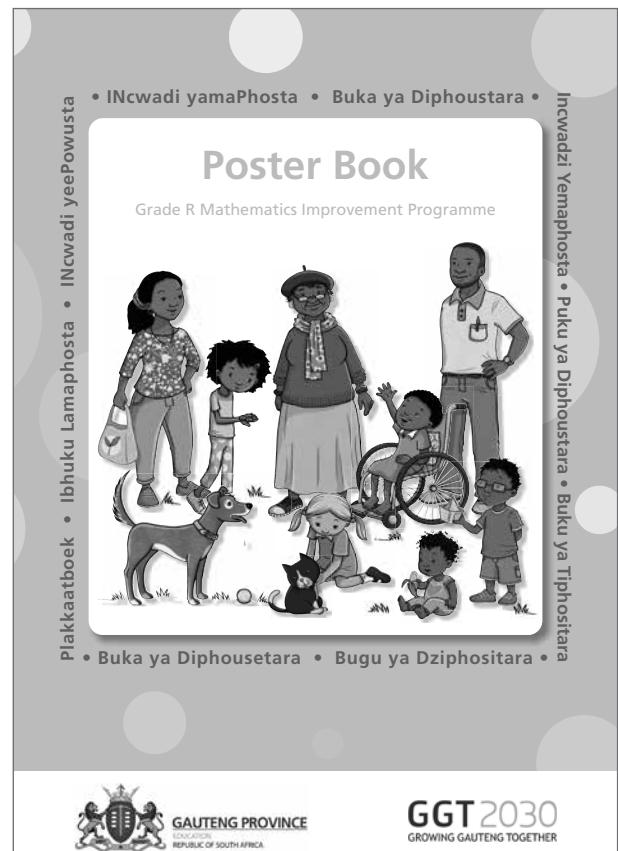

- tšhate ya bogodimo
- dikarata tsa go tshameka jambo
- sekamadi: madi a ditshipi le a dipampiri (go a dirisa mo lebenkeleng la mantlwane)
- tshupanako e kgolo ya lenaka ya lebota
- sekalamaleka
- dibaga tsa go rulaganya, go loga le go dira dipaterone
- didiriswa tsa go tshameka ka metsi le motlhaba
- didiriswa tsa go palama, go itsetsepela, go ikakga le go tlola.

## Whole class activities

### Day 1

#### What you need

- Unifix blocks
- Unifix pattern train
- Piece of A3 paper to create a train tunnel

**TIP**  
Ask the learners if they can remember what number they were counting to before they went on holiday, and what number they were counting backwards from.

1. **Song:** Learners sing a song of their choice from previous terms.
2. **Oral counting:** 1–20 and 7–1.
3. **Counting objects 1–7:** Show learners a Unifix tower made of seven blocks.  
**Guiding questions:**
  - ★ How many blocks do you think make up this tower?

Learners estimate the number of blocks. Remove the blocks one at a time as learners count them.
4. **What makes a pattern:** Place the Unifix pattern train inside the tunnel. Pull the train out slowly and ask learners to notice what pattern emerges.  
**Guiding questions:**
  - ★ What do you see?
  - ★ What colour block do you think will come out of the tunnel next? Why?
  - ★ Is this a pattern? What makes it a pattern?

Draw the learners' attention to the repeating part which makes the pattern.

Make another train with Unifix blocks that does not have a pattern. Repeat the activity with the train and the tunnel.

**Guiding questions:**

  - ★ Is this a pattern? Tell me why you think that.
  - ★ Can you see any patterns in the classroom?

**TIP** Place the tunnel in the block area and encourage learners to make their own pattern trains.

Learners go on a pattern walk outside and discuss patterns.

- ★ Can you see a pattern? Tell me about it.
  - ★ Is there a pattern on the ...?
  - ★ What makes it a pattern?
  - ★ What part of the pattern repeats?
  - ★ Can you hear any patterns? Tell me what you hear.
5. **Small group activities:** Describe the activities at each workstation.

3. **Counting objects 1–7:** Learners fetch instruments. All the learners with the same kind of instrument sit in a group. Play seven beats on a drum.

**Guiding questions:**

- ★ How many beats did you hear?
- ★ How do you know?

Starting with 1, each group makes one more beat than the previous group, until one group gets to 7.

4. **Rhythm patterns:** Divide learners into groups. Give each group a different musical instrument. The groups make sounds with their instruments and describe these sounds. Then they compare the sounds that the different instruments make.

**Guiding questions:**

- ★ What does your instrument sound like?
- ★ Can you make a soft/loud sound; a fast/slow sound?
- ★ How do the instruments sound the same/different?

4. **Go lemoga karolo e e tlhaelang ya paterone:** Dirisa maungo a a dirilweng ka tege ya go tshameka go tlholo paterone. Supang selwana sengwe le sengwe mmogo mme lo bue paterone.

**TIP**  
Make sure that there are movements that all learners are able to participate in, including learners with motor impairments.

1. **Rhyme:** Say the rhyme, *It's pattern time*.
2. **Oral counting:** 1–20 and 7–1.
3. **Counting objects 1–7:** Play an instrument as learners move around. When the music stops, call out a number between 1 and 7. Learners form groups of different sizes according to the number.
4. **Extending physical patterns:** Choose six learners to make a body pattern, for example, two sitting, one standing, two sitting, one standing. Discuss the pattern.

#### Guiding questions:

- ★ Is this a pattern?
- ★ Can you describe the pattern?
- ★ What is the repeating part of the pattern?
- ★ How could we extend the pattern?

Learners continue the pattern by standing or sitting.

- ★ What would come next?
- ★ Can anyone join the line? What will you do?

Repeat the activity using other body positions, for example, kneeling and lying down.

Choose eight learners to arrange themselves into their own pattern.

- ★ How did you decide what to do for your pattern?
- ★ What pattern have you made? How do you know it is a pattern?
- ★ How can we extend this pattern?

Other learners join the line and extend the pattern.

## Integration

**Home Language:** Emergent Writing: Draw patterns.

**Life Skills:** Fine motor development: Identify, copy and extend patterns in the environment. Gross motor development: Paint a hopscotch grid outside or draw one on the ground with chalk. Learners jump on the blocks of the grid following the number sequence, landing with feet together or feet apart, depending on the number of blocks in each row of the grid.

## Small group activities

### Teacher-guided activity

#### What you need

- 6 everyday objects
- A tray
- A tub for each learner with:
  - Structure beads (*Resource Kit*)
  - ‘What’s missing?’ pattern card
  - Unifix pattern card
  - Unifix blocks
  - 10 attribute blocks

1. **Structure beads:** Ask learners to show you a number of beads between 1 and 7. Learners put the beads into different arrangements of the same number.

#### Guiding questions:

- ★ How many red/yellow beads are there?
- ★ Can you show me seven beads?
- ★ Show me four beads. What did you do to make four?
- ★ What should you do to have six beads?

2. **What’s missing? (Kim’s game):** Place five objects on a tray, one at a time while learners watch.

#### Guiding questions:

- ★ What did I put on the tray first?
- ★ What did I put on the tray next?
- ★ What did I put on the tray last?

Now learners should look at the tray and try to remember what objects are on it. Cover the tray with a cloth and then remove one object. Lift the cloth. Learners say which object is missing. Repeat, removing a different object each time.

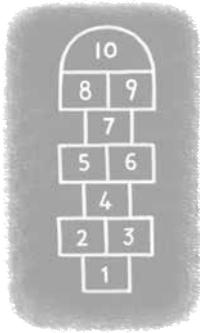

3. **What’s missing? pattern:**

Learners take a ‘What’s missing?’ pattern card from their tub. They say which part of the pattern is missing and arrange their attribute blocks to copy the pattern, filling in the missing part.

#### Guiding questions:

- ★ What comes first/next/last?
- ★ What is missing?

## Tomagano

**Puogae:** Mokwalo wa Tshoganyetso: Rala dipaterone.

- ★ Ke eng se se tlhaelang?

 **TIP**

If a pattern with two attributes is too difficult for learners, they can make a pattern with one attribute.

**4. Copying and extending own pattern:**

Learners use their Unifix blocks to copy and extend a pattern from the Unifix pattern card (vertically and horizontally).

**Guiding questions:**

- ★ What comes before/after/next?
- ★ Can you finish the pattern?
- ★ What part of the pattern repeats?

**5. Create own pattern:** Learners create a pattern with attribute blocks and explain their pattern. For example:

- ★ One attribute: shape: circle, square, triangle.
- ★ Two attributes: colour and shape: red circle, yellow square, green triangle.

**Guiding questions:**

- ★ Can you describe your pattern?
  - ★ What makes it a pattern?
  - ★ How can you carry on your pattern?
- Make a sequence of attribute blocks that is not a pattern.
- ★ Is this a pattern? Tell me why not.

**Check that learners are able to:**

- break down and build up numbers between 1 and 7
- create and explain their own pattern with three colours and shapes
- extend a repeating pattern
- explain whether something is a pattern or not
- show the part of the pattern that repeats

## Whole class activities

### Day 1

#### What you need

- Rhyme: *It's pattern time* (page 190)
- Number 6 story (page 190)
- Number frieze and house template for number 6 (page 204)

**TIP**  
Practise songs and rhymes learnt in previous weeks throughout the daily programme, for example, during toilet routines.

1. **Rhyme:** Say the rhyme, *It's pattern time* from Week 1.
2. **Oral counting:** 1–20 and 7–1.
3. **Counting objects 1–7:** Learners sit in a circle. Ask a learner to flap a few times like a duck.

#### Guiding questions:

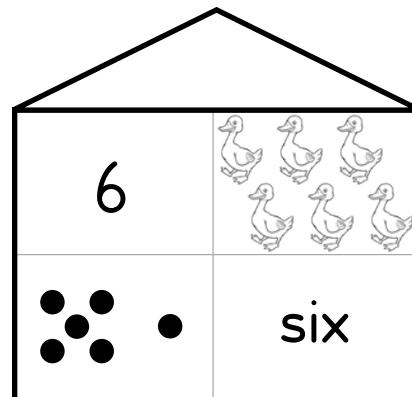

- ★ Was it more or fewer than seven times?
- ★ How do you know?
- ★ Can you all flap seven times?

4. **Introducing number 6:** Point to number friezes 1–5.

#### Guiding questions:

- ★ How many animals do you think will live in the next house?
- ★ Will there be more or fewer than five?

Tell the *Number 6 story*. The animals' house is the focus of the story. Show the parts of the number frieze as you build up the story of the animals and images of the house: the different representations of number 6, for example, the picture, the dots, the symbol and the word. Display the parts of the frieze in the animal house on the wall in the maths area. Count the ducks together.

#### Guiding questions:

- ★ Who has seen a duck before? Where?
- ★ What noise does a duck make?
- ★ Can you quack six times? Can you waddle as you quack?
- ★ How many more ducks are there than monkeys?
- ★ How many fewer giraffes are there than monkeys?
- ★ If each duck hatched from an egg, how many eggs would there have been?

5. **Small group activities:** Describe the activities at each workstation.

## Day 2

## What you need

- Song: *Six little ducks* (page 190)
- 5 number 6 dot, symbol and word cards
- Number picture, symbol and dot cards 1–6 (*Resource Kit*)

1. **Song:** Introduce the song, *Six little ducks*.
2. **Oral counting:** 1–20 and 7–1.
3. **Counting objects 1–7:** Choose two learners to take turns to flap fewer than six times while other learners clap. Compare the number of flaps. Ask the same questions as on Day 1. Learners all flap and count as you clap from 1 to 7.
4. **Dot cards 1–6 game:** Show picture, dot and number symbol cards 1–6. Learners organise themselves into groups according to the card that you show.
5. **Maths table:** Groups of six learners collect six similar small objects outside, for example, twigs or leaves. Learners return to sit on the mat in their groups. Each group says what and how many objects they have found. Discuss the similarities and differences between their collections. Give a number 6 dot, symbol or word card to each group. One group at a time puts their objects and number 6 card on the table.

2. **Oral counting:** 1–20 and 10–1.
3. **Counting objects 1–10:** Hold up one finger at a time and together count 1–10. Learners turn to a partner and take turns to count one another's fingers.

#### TIP

If possible, ask learners to bring a pair of gloves to school. Show an example and discuss what they understand by the word 'pair' (a set of two things used together). They can think of pairs on their bodies, for example, hands, legs, eyes, and so on.

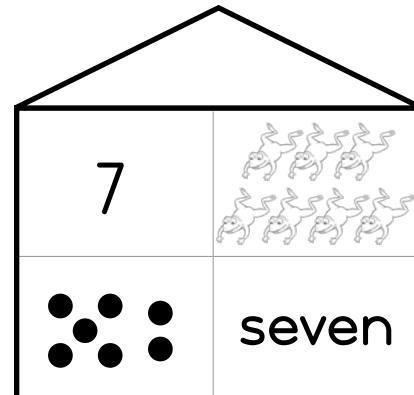

#### Guiding questions:

  - ★ What else do we have ten of on our bodies?
4. **Introducing number 7:** Point to number friezes 1–6.

#### Guiding questions:

- ★ How many animals do you think will live in the next house?
- ★ Will there be more or fewer than six?

Tell the *Number 7 story*. Show the parts of the number frieze as you build up the story of the animals and images of the house: the different representations of number 7, for example, the picture, the dots, the symbol and the word. Display the parts of the frieze in the animal house next to number 6 on the wall in the maths area. Count the frogs together.

#### Guiding questions:

- ★ How many more frogs are there than ducks?

|---|--|

1. **Word problems:** Look at the seven frogs and seven playdough flies.

#### Guiding questions:

- ★ Six frogs each eat a fly. How many flies are left?
- ★ How do you know? Tell me how you got your answer.

2. **Practising more than, fewer than, equal to:** Look at the seven frogs and seven flies again.

#### Guiding questions:

## Whole class activities

### Day 1

#### What you need

- 2 shopping bags, one with 5 tins of food of the same mass; the other with 5 toilet roll inners
- Everyday objects of different mass

1. **Song:** Learners sing one of the songs from the previous weeks.
2. **Oral counting:** 1–20 and 10–1.
3. **Counting objects 1–10:** Learners count the contents of the first shopping bag (five tins) and then the second shopping bag (five toilet roll inners).

#### Guiding questions:

- ★ How many items are there in the first/second shopping bag?
  - ★ If we count all of these items, how many do you think there will be?
4. **Comparing heavier and lighter:** Tell a story about going shopping at the store and buying tins of food and toilet rolls. Show learners the shopping bags and tell them that the teller packed the toilet rolls into one packet and the tins into another packet.

#### Guiding questions:

- ★ Which packet would you like to carry? Why?
  - ★ Why do you think we need to know how heavy or light things are?
- Replace the items in their bags. A few learners take turns to pick up each of the shopping bags.
- ★ Which shopping bag feels lighter/heavier than the other?
  - ★ Which is bigger, a tin or a toilet roll?
  - ★ Are all big objects lighter than smaller objects?

**TIP**  
Make sure that all learners have a turn so that they can all enjoy the whole class activity.

Place the everyday objects on the mat.

- ★ Which item do you think will be the heaviest/lightest? How can you tell?

Learners take turns to point to two items and predict which one would be heavier and which would be lighter.

- ★ Do you think it will be lighter/heavier than the \_\_\_\_\_?

**Guiding questions:**

- ★ What objects in our classroom do you think weigh more than/less than this water bottle?

Two learners find one object each in the classroom that they think weighs more than the water bottle and two learners find objects that they think weigh less than the water bottle.

- ★ Do you think the object will weigh more/less than the water bottle? Why?

Learners then compare the mass of their object to the mass of the water bottle on the balance scale.

- ★ Is the \_\_\_\_\_ heavier/lighter than the water bottle?

- ★ Did you estimate correctly?

5. **Small group activities:** Describe the activities at each workstation.

## Integration

**Guiding questions:**

- ★ Which group do you think is lighter/heavier than the other?
- ★ Why do you think the \_\_\_\_\_ group is heavier?

Learners take turns to hold a group of fruit counters in one hand and a group of Unifix blocks in the other hand and compare their mass.

- ★ Which feels heavier/lighter?

3. **Using a balance scale to measure mass:** Place the balance scale on the mat.

**Guiding questions:**

- ★ How can we find out which is the heavier of the two groups?

In pairs, learners use the balance scale to compare the mass of the objects to one another.

- ★ Which group do you think is heavier/lighter?
- ★ Do any groups weigh the same?
- ★ How do you know?
- ★ Did you estimate correctly?

Place the stone on the mat. Learners predict whether a Unifix block/a grape counter will be heavier or lighter than the stone.

Learners take turns to compare the mass of the Unifix block/grape counter to the mass of the stone.

- ★ Which objects are lighter/heavier than the stone?
- ★ Which is the heaviest/lightest object?

**Check that learners are able to:**

### What you need

- A4 page with pictures of 'heavy' and 'light' objects
- Real-life 'heavy' and 'light' objects to match the pictures shown on the A4 page
- A4 page with 'heavy' and 'light' columns
- Scissors
- Glue

Learners decide which objects they think are heavy and which are light. They then cut out the pictures to match these objects and paste them in the appropriate columns.

## Workstation 2

### What you need

- Balance scale
- Everyday objects to be weighed

Learners use the balance scale to weigh objects and tell one another which is heavier or lighter.

## Workstation 3

### What you need

- 5 containers of the same size filled with different materials, for example, sand, buttons, small stones, water, seeds

Learners arrange the containers in order from heaviest to lightest.

## Workstation 4

### What you need

- Container filled with water/sand for water and sand play
- Measuring containers of different sizes and shapes

Learners compare how much water/sand the different containers hold and compare their mass, using the vocabulary: light/heavy, lighter/heavier, lightest/heaviest. Learners may talk about which containers hold more, less, the same amount of water/sand and compare which containers are lighter/heavier.

**TIP** Preparation for Week 6: Ask learners to each bring seven empty plastic cold drink bottles from home for activities they will do in Week 6. These can be different sizes.

### Teacher-guided activity

What you need	
<ul style="list-style-type: none"> <li>• Number dot, symbol and word cards 1–8 (<i>Resource Kit</i>)</li> <li>• Ball</li> <li>• Playdough</li> <li>• Boards</li> <li>• Paper</li> <li>• Pencils</li> </ul>	<ul style="list-style-type: none"> <li>• A tub per learner with:           <ul style="list-style-type: none"> <li>– 10 counters</li> <li>– Playdough</li> <li>– 3 lids</li> <li>– A yoghurt cup with beans marked with black koki on one side</li> <li>– 5 animal counters</li> </ul> </li> </ul>

If a learner has made an error in the calculation, ask if they want to use counters to show you what they have done. Don't simply say the learner is 'wrong'. Guide them to the correct answer.

1. **Oral counting 1–20:** Learners roll the ball to each other as they count from 1 to 20 (and beyond if they are able to).

2. **Word problems:** Present learners with problems to solve. They can use the counters in their tub to represent and help them solve the problems.

#### Guiding questions:

- ★ There are ten mice in a cupboard. If three mice run away, how many mice will be left in the cupboard?
  - ★ If one mouse comes back, how many mice will be in the cupboard?
- Ask learners to tell you how they got their answers.

3. **Practising 1–8; more/fewer/equal:** Show a number symbol card from 1 to 8. As quickly as they can, learners make the same number of balls with their playdough. They find the number word and dot card to match.

Ask learners to take out two of the lids from their tubs. They should place two balls on one lid and four on the other lid.

#### Guiding questions:

- A long piece of string
- Per learner:
  - Orange, red, blue, green fish
- A ‘fishing rod’
- Cardboard pictograph grid with the same colours as the fish
- Counters (orange, red, blue and green)

Make a pond with the string. Place the fish in the pond. Learners roll the dice and ‘catch’ the fish that matches the colour on the dice. They place a matching counter on their pictograph grid. Repeat until learners have caught six fish each.

# Whole class activities

## Day 1

### What you need

- Rhyme: *Going on a lion hunt* (page 198)
- A tin
- 10 attribute blocks (*Resource Kit*)
- 3-D objects to trace: circle, square, triangle, rectangle – 1 per learner
- A3 paper with four rows and a shape at the start of each row: circle, square, triangle, rectangle
- Musical instrument

1. **Rhyme:** Say the rhyme, *Going on a lion hunt*. Learners join in.
2. **Oral counting:** 1–20 and beyond, 10–1.
3. **Counting objects 1–10:** Learners sit in a circle. Drop a number of attribute blocks between 1 and 10 into a tin one at a time. Learners count as they hear each block hit the bottom of the tin. Repeat.
4. **Properties of shapes:** Put up the picture of a square.

### Guiding questions:

- ★ What is this shape?
- ★ What can you remember about this shape?
- ★ How do you know it is a square?
- ★ Can you see any square-shaped objects in the classroom?

As music plays, learners move around the classroom looking for square-shaped objects. When the music stops learners find the object and bring it to the mat.

- ★ Was this object easy to find? Why?/Why not?
- ★ How many sides/corners/edges does it have?

They trace around the base of the object in the grid.

- ★ How is your drawing the same/different from the \_\_\_\_\_ you have drawn around?

The learners who found the squares sit down. Repeat with each shape until all learners have had a turn.

Look at the completed grid.

- ★ How many circles/triangles/squares/rectangles do you see?
- ★ Which shape do we have the most/least of?
- ★ How is the square/triangle/circle the same/different from the rectangle, and so on?
- ★ Which shapes have four/three sides?
- ★ Which shapes have no sides?

5. **Small group activities:** Describe the activities at each workstation.

**TIP**

Encourage learners to show you the total number of beads without counting in ones.

**TIP**

Learners use counters to solve the problems. Ask learners how they got their answers and let them explain their thinking. Learners need time to explain their reasoning and hear the strategies of others in the group.

2. **Structure beads:** Show learners a number of structure beads between 1 and 10, for example, 6, 3, 7, 4 or 8. Flash these for a few seconds, and then hide them away.

**Guiding questions:**

- ★ How many beads did you see?

Ask learners to show a number of beads between 1 and 6.

3. **Fruit on plates:** Learners use the eight fruit counters from their tubs to solve the problems.

**Guiding questions:**

- ★ Each fruit needs a plate. How many plates will you need?
- ★ Each plate needs two fruits. How many plates will you need?
- ★ If you have two plates, how many fruits can you put on each plate?

Learners compare and discuss how many fruits they would place on each plate.

4. **Banknotes:** Hide a note under a piece of paper.

**Guiding questions:**

- ★ The banknote under the paper is green and has a rhino on it. What is this banknote called?

Give learners each a turn to hide and describe a banknote.

**TIP**

Learners can create their own banknotes that they would like to use, for example, 'on the moon'.

Learners cut out the rectangles. Referring to the banknotes, they create their own banknotes by drawing pictures on both sides and writing a number on one side of each rectangle.

## Whole class activities

### Day 1

#### What you need

- Rhyme: *Spaceship* (page 200)
- 10 spaceships each with 10 windows (from Week 9)
- Small smiley face stickers/cards – 1 per learner
- 2 hula hoops
- 8 mouse picture cards
- 2 small circle cut-outs: red and green

1. **Rhyme:** Say the rhyme, *Spaceship* from Week 9.
2. **Oral counting:** 1–20 and beyond, 10–1.
3. **Counting objects 1–10:** Learners sit in a circle. Together count the spaceships as you place them in a circle on the mat. Hand out a smiley face sticker/card to each learner. Learners take turns to stick their sticker onto the windows of the first/second/third, and so on spaceship. Count 1–10 as they do this.

Explain that learners will continue to put 'people' into the spaceships on other days.

#### Guiding questions:

- ★ How will we know when the first spaceship has 10 'people' in it?
  - ★ How will we know when we should start putting 'people' into the second spaceship?
  - ★ Do you think we will have enough stickers for the second spaceship?
  - ★ How many spaceships have/still need stickers?
- Count the people in the spaceships together.

4. **Grouping; introducing half:** Give eight learners each a picture of a mouse. Place two hoops on the mat.

#### Guiding questions:

- ★ How can we make sure that each hoop has the same number of mice?
- Learners put four mice in one hoop and four mice in the other hoop. Explain that when we put the same number of mice in each hoop, we say that half of the mice are in the one hoop and half of the mice are in the other hoop.

The mouse pictures can be attached to a crown to add a fun element.

Count the people in each of the ‘completed’ spaceships 1–10.

**TIP**  
This game is best played outside so that learners have the space to run around the circle.

4. **Practising 1–8, dot cards game:** Learners sit in a circle. Hand out a number symbol or word card from 1 to 8 to each learner. Play the game, I wrote a letter to my friend. Place two number dot cards between 1 and 4 into an envelope. One learner walks around the outside of the circle as the class says the rhyme. The learner drops the envelope behind another learner and runs around the circle. After chasing the learner who dropped the envelope, the learner who picked up the envelope opens it. She/he holds up one card, then the other card and then both cards. Ask all learners these questions:

## Songs, rhymes and stories

### Week 1

#### Rhyme: It's pattern time

It's pattern time,  
It's pattern time,  
So move your body while I move mine.  
Move your hands.  
Move your feet.  
Stand up, sit down, do something neat.  
The pattern you'll hear now is new. What will  
your body do?  
Clap your hands,  
Stamp your feet, do something neat.  
The pattern you'll hear now is new. What will  
your body do?  
Jump in the air,  
Hop on one foot, do something neat.

#### Story: Number 6 story (with Number 6 frieze template)

Next came the six Ducks. They were a family. There was a father, a grandmother, a grandfather, an aunt and two ducklings. This meant that there were four adult ducks and two ducklings in the family of six.

The number symbol 6 and number word six went on the front of the house where everyone could see them. And six doorbells went on the front door.

The Ducks didn't put a pond in their lounge nor a bath in their bathroom, even though they loved to swim. They preferred to waddle down to the stream near their house. They did this because there were a lot of insects that lived near the stream, so they could look for food in the water and on the banks of the stream. The father duck made sure that the ducklings each ate six beetles for breakfast, six dragonflies for lunch and six mosquitoes for supper. The adults ate more than this because they had bigger tummies to fill.

The Ducks had a party to celebrate their new home. All the animals came. One Elephant from house number 1, two Zebras from house number 2, three Meerkats from house number 3, four Giraffes from house number 4 and five Monkeys from house number 5. They all brought their own food because they didn't all like eating insects.

### Week 2

#### Song: Six little ducks

Six little ducks went swimming one day  
over the hill and far away.  
Daddy duck said, 'Quack, quack, quack, quack,'  
and only five little ducks came waddling back.  
*(Repeat for five, four, three, two)*  
One little duck went swimming one day  
over the hill and far away.  
Daddy duck said, 'Quack, quack, quack, quack,'  
and no little ducks came waddling back.  
Daddy duck went out one day  
over the hill and far away.  
Daddy duck said, 'It's time to come back,'  
and the six little ducks came waddling back.

## Week 3

### Song: Seven green speckled frogs

Seven green speckled frogs  
Sat on a speckled log  
Eating the most delicious flies.  
One jumped into the pool  
Where it was nice and cool  
Then there were six green speckled frogs.  
Glug-glug.

(Repeat with six, five, four, three, two, one)

Then there were no green speckled frogs.  
Glug-glug.

### Story: Number 7 story (with Number 7 frieze template)

Next came seven Frogs. They were friends of the six Ducks, who had told them how much fun they were having in their new home. The Ducks invited the Frogs to be their neighbours. The Frogs needed space to jump without knocking their heads on the walls or ceilings, and they each wanted their own room. They jumped up and down and looked inside and decided that because they were smaller than all the other animals in houses 1 to 6, they would be comfortable and have enough space.

The number symbol 7 and number word seven went on the front of the house where everyone could see them. And the seven doorbells went on the door. The seven Frogs didn't always use the front door as they preferred to jump in and out of the windows. They enjoyed seeing who could jump the highest.

They wanted a big bath in each of their seven bedrooms so that they could swim whenever they wanted to. And they also built a pond in their lounge. It had seven lily pads so that each of them had a place to sit. When the other animals came to welcome them, they found all seven Frogs swimming together in the indoor pond in the lounge.

The seven lily pads each had a beautiful yellow flower growing next to it, which the other animals often came to look at.

### Song: One little, two little

One little, two little, three little fingers

Seven little, eight little, nine little fingers  
We all have ten fingers.

### Song: *One elephant went out to play*

(To the tune of *Five little elephants*)

One elephant went out to play  
Upon a spider's web one day.  
He thought it such a tremendous stunt  
That he called for another little elephant.  
Two elephants went out to play  
Upon a spider's web one day.  
They thought it such a tremendous stunt  
That they called for another little elephant.

### Rhyme: Eight little mice

Eight little mice creeping through the house,

Eight little mice come out to play.

But if one big cat catches one little mouse

Then seven little mice will run away!

(Repeat for seven, six, five, four, three, two)

One little mouse creeping through the house,

One little mouse comes out to play.

But if one big cat tries to catch that mouse

That mouse is going to say, 'You great big bully, go away!'

### Story: Number 8 story (with Number 8 frieze template)

Next came eight Mice. The number symbol 8 and number word eight went on the front of the house where everyone could see them. And the eight doorbells went on the door. The Mice nibbled eight holes through the wooden floors in their rooms and made underground tunnels so that they could go in and out of the house from their eight bedrooms.

They didn't need big bedrooms as they were so small. They were used to living in the fields as they were field mice, but were excited about the idea of living in a new home next door to the Frogs.

They built a big lounge as they loved to dance and have parties. They each played an instrument. One played the keyboard, one a guitar, one a violin, one a flute, one a trumpet, one a marimba and two played drums. So there were eight instruments in the house. The other animals loved listening to the eight Mice playing their eight instruments. Sometimes they would all join in by stamping their feet and hooves to the beat.

### Game: I wrote a letter to my friend

One player walks around the outside of the circle with an envelope.

The class says:

*'I wrote a letter to my friend, and on the way I dropped it.'*

*'One of you has picked it up and put it in your pocket.'*

*'It's not you, it's not you, it's not you ...'*

When deciding whom to drop the envelope behind, the person taps that person on the head and says, *'It's you!'*

They then run, with the person who now has the envelope chasing them, once around the circle of learners and try to get to sit in that person's empty place before they are caught.

If the person is caught, he or she has to sit in the middle of the circle.

The new person holding the envelope starts walking around the circle, while the class says the words, *'I wrote a letter ...'*

And so the game goes on.
