The Grade R Mathematics and Language Improvement Project is an initiative of the **Gauteng Department of Education** and its key partner, the **Gauteng Education Development Trust**.

The development and production of the training and classroom resources for the Grade R Mathematics and Language Improvement Project were made possible by generous project funding from the **United States Agency for International Development** and the **Zenex Foundation**.

The Grade R Mathematics and Language Improvement Project is managed by **JET Education Services** with **UCT's Schools Development Unit** and **Wordworks** as technical partners.

The **Schools Development Unit (SDU)** at the **University of Cape Town (UCT)** is the mathematics technical partner to the Grade R Mathematics and Language Improvement Project. The SDU is a unit within UCT's School of Education that focuses on teachers' professional development in Mathematics, Science, Literacy/Language and Life Skills from Grade R to Grade 12. The SDU offers teacher qualifications and approved UCT short courses, school-based work, materials development and research to support teaching and learning in all South African contexts.

Hlamusela patironi ya wena n'wini (nawu wo vuyelela).

## Understanding patterns

### Facilitator's notes

- ◆ PPT: Refer groups to Poster 7 in the *Poster Book* and have them complete **Activity 3**.
- ◆ PPT: Give a definition of a pattern and a sequence, using the information below. Demonstrate these explanations.  
*A **pattern** describes the regular sequence of objects, pictures, movements, actions or events that are repeated in a predictable way.*  
*A **sequence** is the particular order in which objects, pictures, movements, actions or events follow each other.*

Developing an understanding of patterns is an important part of maths. Patterns are all around us and children encounter lots of patterns in their daily lives at home and at school.

Think about your own understanding of the Content Area: Patterns, Functions and Algebra and complete Activity 3 with your group.

### Activity 3

In your group, discuss:

1. What kinds of patterns might Grade R learners observe in their daily lives?

---

---

Patterns in clothes, on buildings, in nature (e.g. flower, beehive).

### Facilitator's notes

- ◆ PPT: Pictures of patterns around us in our natural and built environment.
- ◆ Discuss how a sequence of items can be extended but that this won't necessarily create a pattern.
- ◆ Look at examples of where a sequence is repeated to create a pattern.

2. Look at Poster 7 in the *Poster Book*.

- ◆ What patterns do you see?

---

---

- ◆ What is the pattern?

---

---

Identify the 'repeat' part of the pattern.

Elements are repeated (unless it is an irregular pattern, e.g. bark on a tree, random patterns on paper or fabric).

## Ku twisisa tipatironi

### Tinotsi ta muhumelerisi

- ◆ PPT: Kongomisa mitlawa eka Phositara ya 7 leyi nga eka *Buku ya Tiphositara* kutani u va endla leswaku va hetisa **Nghingiriko wa 3**.
- ◆ PPT: Nyika nhlamuselo ya patironi na malongolokelo, hi ku tirhisa vuxokoxoko lebyi nga laha hansi. Kombisa tinhlamuselo leti.  
*Patironi* yi hlamusela hi ku hlawulekisa malongolokelo ya ntolovelo ya michumu, mifambafambo, swiendlo kumbe swiendleko leswi swi vuyeleriweke hi ndlela yo vhumbeka.  
*Malongolokelo* i nandzelelano wo karhi lowu michumu, swifaniso, mifambafambo, swiendlo kumbe swiendleko swi landzelelanaka hayona

Ku tumbuluxa ntwisiso wa tipatironi i xiphemu xa nkoka xa matematiki. Tipatironi ti kona hinkwakonkwako laha hi nga kona naswona vana va hlanguana na tipatironi to tala evuton'wini bya vona bya siku na siku ekaya na le xikolweni.

Ehleketi hi mayelana na ntwisiso wa wena n'wini wa Xiyenge xa Vundzeni: Tipatironi, Tifankixini na Alijebura kutani u hetisa Nghingiriko wa 3 na ntlawa wa wena.

### Nghingiriko wa 3

Entlaweni wa n'wina, kanelani:

1. Xana i mixaka yihi ya tipatironi leyi vadyondzi va Giredi ya V va nga ha hlanganaka na yona evuton'wini bya vona bya siku na siku?

---

### Tinotsi ta muhumelerisi

- ◆ PPT: Swifaniso swa tipatironi leti nga laha hi nga kona eka mbangu wa ntumbuluko na mbangu lowu akiweke.
- ◆ Kanelani hilaha malongolokelo ya michumu ya nga ndlandlamukisiwaka hakona kambe ngopfungopfu a swi nga ta tumbuluxa patironi.
- ◆ Langutani swikombiso swa laha malongolokelo ya vuyeleriwaka hakona ku tumbuluxa patironi.

2. Langutani eka Phositara ya 7 leyi nga eka *Buku ya Tiphositara*.

- ◆ Xana i tipatironi tihi leti mi ti vonaka?

- ◆ Xana patironi leyi i yini?

---

Kuma xiphemu lexi 'vuyelelaka' xa patironi leyi.

Swiphemu swa vuyeleriwa (handlekaloko ku ri patironi yo gombonyoka, xik. rihanti ra nsinya, tipatironi ta muhulahula leti nga ephepheni kumbe elapini).

- ◆ Can you repeat the pattern? Explain.
- 
- 

A **pattern** describes the regular sequence of objects, pictures, movements, actions or events that are repeated in a predictable way.

A **sequence** is the particular order in which objects, pictures, movements, actions or events follow each other.

## Identifying patterns

### Facilitator's notes

- ◆ Explain that in a regular pattern we can see how the elements in a pattern are repeated, and we can predict the order or sequence that the pattern will follow.
- ◆ PPT: Circles and squares repeated to form a pattern.
- ◆ Refer participants to the circle and square patterns in the *Participant's Workbook*. Use the questions that follow to demonstrate how we can see that the circle and square are repeated and use this to predict what the next shape will be.
- ◆ In the pattern below we can see that the circle and square are repeated, and we can predict that the next shape in the sequence will be a circle, followed by a square and so on.

In a regular pattern, we can see how the elements in the sequence are repeated. We can also predict the order or sequence of the elements and how they will be repeated to create a pattern. In the pattern below we can see that the circle and square are repeated and we can predict what the next shape in the sequence will be.

### Activity 4

1. Which shape is first?  

---
2. Which shape is next?  

---
3. What shape do you think will come after the last square?  

---
4. How would you extend the pattern?  

---

Repeating patterns are made up of a repeated sequence of elements, e.g. shapes, colours, sounds, objects, movements.

- ◆ Xana u nga kota ku vuyelela patironi leyi? Hlamusela.
- 

**Patironi** yi hlamusela hi ku hlawulekisa malongolokelo ya ntolovelo ya michumu, mifambafambo, swiendlo kumbe swiendleko leswi swi vuyeleriweke hi ndlela yo vhumbeka. **Malongolokelo** i nandzelelano wo karhi lowu michumu, swifaniso, mifambafambo, swiendlo kumbe swiendleko swi landzelelanaka hayona.

### Ku kuma tipatironi

#### Tinotsi ta muhumelerisi

- ◆ Hlamusela leswaku eka patironi yo olova hi nga kota ku vona hilaha swiphemu leswi nga eka patironi swi vuyeleriwaka hakona, naswona hi nga kota ku vhumba nandzelelano kumbe malongolokelo lama patironi yi nga ta ma landzelela.
- ◆ PPT: Swirhendzevutana na swikwere leswi swi nga vuyeleriwa ku vumba patironi.
- ◆ Kongomisa vatekaxiave eka tipatironi ta xirhendzevutana na ta xikwere leti nga eka *Buku ya Ntirho ya Vatekaxiave*. Tirhisa swivutiso leswi landzelaka ku kombisa hilaha hi nga vonaka hakona leswaku xirhendzevutana na xikwere swa vuyeleriwa na ku tirhisa leswi ku vhumba leswaku xivumbeko lexi landzelaka xi ta va yini.
- ◆ Eka patironi leyi hi nga kota ku vona leswaku xirhendzevutana na xikwere swa vuyeleriwa, naswona hi nga kota ku vhumba leswaku xivumbeko lexi landzelaka eka malongolokelo ku ta va xirhendzevutana, xi landzeriwa hi xikwere na swo kota sweswo.

Eka patironi yo olova, hi nga kota ku vona hilaha swiphemu leswi nga eka malongolokelo swi vuyeleriwaka hakona. Hi nga tlhela hi kota ku vhumba nandzelelano kumbe malongolokelo ya swiphemu na hilaha swi nga ta vuyeleriwa hakona ku tumbuluxa patironi. Eka patironi leyi nga laha hansi hi nga kota ku vona leswaku xirhendzevutana na xikwere swa vuyeleriwa naswona hi nga kota ku vhumba leswaku xivumbeko lexi landzelaka eka malongolokelo lama xi ta va yini.

#### Nghingiriko wa 4

### Facilitator's notes

- ◆ PPT: Display the following sequence of attribute blocks:

- ◆ Ask participants to look at the pattern and to use the attribute blocks on their tables to copy the sequence. Groups then complete **Activity 5**.

In the next activity, the facilitator will show you a sequence of shapes. You will use the attribute blocks on your table to copy this sequence and discuss how to extend this to create a pattern.

### Activity 5

1. What is the pattern?

---

---

2. What is the repeating part of the sequence?

---

---

### Facilitator's notes

- ◆ The point of this activity is to identify the repeating part of the sequence, i.e. the pattern. Does the pattern begin with the yellow square and end with the blue circle? Or does the pattern begin with the yellow square and end with the yellow square?
- ◆ Explain that learners need to be able to identify the pattern before they can extend or create their own pattern.
- ◆ Emphasise that teachers should always repeat the pattern at least twice before asking learners to extend it, for example:

- ◆ After these activities highlight the importance of introducing learners to patterns that have only one attribute that differs, e.g. shape, and providing them with a long enough repeat sequence (e.g. three repeats) so that they can work out the pattern.
- ◆ Ask participants for examples of the kinds of patterns that families might find in their own homes and communities (**context principle**).
- ◆ Reflect on how a learner's experience of everyday patterns is the starting point for understanding the concept of pattern (**level principle**).

## Tinotsi ta muhumerisi

## Tinotsi ta muhumerisi

Introduce learners to patterns that start with only one attribute that differs, e.g. shape, and provide enough items in the sequence so that learners can work out what the pattern is (the repeating part in the sequence).

It is important for teachers to provide a range of opportunities for learners to identify, copy and create different kinds of patterns using sounds, actions, objects and pictures.

## Video 2

*Activity Guide: Term 1, Week 6, Days 2, 3 and 4 (pages 104–111)*

Watch the video of the teacher setting up activities that provide opportunities for learners to create and discuss patterns.

Notice how the teacher guides the learners through questions and prompts to create a pattern. Write down the vocabulary that she and the learners using during these activities.

Refer to pages 160–173 of the *Concept Guide* to read more about teaching Patterns, Functions and Algebra in Grade R. You will also find a list of appropriate questions and vocabulary for this Content Area.

The **level principle** says that learners are at different starting points in Grade R. Each learner's prior knowledge is the starting point for what they will learn. They can use what they know already to learn new maths concepts and skills.

Tivisa vadyondzi eka tipatironi leti ti sungulaka hi xihlawulekisi xin'we ntsena lexi xi hambanaka, xik. xivumbeko, na ku nyika michumu yo enela leyi nga eka malongolokelo lama ku endlela leswaku vadyondzi va kota ku tirha va kuma leswaku patironi leyi i yini (xiphemu lexi vuyelelaka eka malongolokelo lama).

# Session 2: Space and Shape (Geometry)

1 hour

## Facilitator's notes

- ◆ Explain that the focus of Week 7 is on Space and Shape (Geometry).
- ◆ Refer participants to pages 126–131 of the *Concept Guide*.
- ◆ Have participants work in groups to complete **Activity 6**. Ask one person from each group to report back.
- ◆ The focus on Space and Shape (Geometry) in this workshop extends the discussion in Workshop 2.

The focus of Term 1 Week 7 is Space and Shape (Geometry). In Workshop 2, we discussed 3-dimensional objects and 2-dimensional shapes and the content of Weeks 3–5 to be implemented in the classroom.

## Term 1 Content overview: Space and Shape (Geometry)

### Activity 6

Refer to the Space and Shape (Geometry) Content Area on pages 126–131 of the *Concept Guide*. You will see that circles, squares and triangles are introduced in CAPS in Term 1 and rectangles are introduced in Term 4. The Maths Programme suggests that rectangles are introduced incidentally in Term 1.

1. When you taught squares did you find that learners confused squares and rectangles? Give reasons to support your answer.

---

---

---

Learners need to see the differences between the two shapes. Even though both have four sides and four corners, the rectangle has two long sides and two short sides, and the square has four sides that are the same length.

2. How were rectangles introduced in Week 3 of the Maths Programme?

---

---

---

Practically by using boxes and discussing and comparing the sides of a box.

## Identifying 2-dimensional shapes (triangles)

### Facilitator's notes

- ◆ Remind participants that in Workshop 2 they learnt about 3-dimensional objects and 2-dimensional shapes.  
*3-dimensional* means that an object has three dimensions: length, width and height.  
*2-dimensional* means that a shape has length and width.
- ◆ Explain that triangles are taught in a similar way to circles and squares in Term 1 (Week 7).

In Grade R learners recognise, identify and name 2-dimensional shapes: circles, squares, triangles and rectangles. The Maths Programme also suggests that learners are encouraged to describe the properties of these shapes, e.g. straight or curved lines, number of lines and corners.

Learners apply their new knowledge of shapes and reinforce this learning in the independent small group activities.

### Video 3

*Activity Guide: Term 1, Week 7, Days 1 and 2 (pages 120–125)*

Watch the video of the teacher introducing the learners to the triangle.

Notice how the teacher encourages the learners to describe the properties of the triangle.

---

---

---

### Facilitator's notes

- ◆ In **Activity 7** participants will reflect on how the *Poster Book* can be used during activities to stimulate discussion.
- ◆ PPT: Display Poster 8 and ask participants to respond to the questions in **Activity 7**.
- ◆ After the activity ask participants which properties of 2-dimensional shapes were discussed and what maths language was used.
- ◆ Remind participants that 2-dimensional means that a shape has length and width (breadth) and that 3-dimensional means that an object has length, width and height.

*Activity Guide: Term 1* provides many opportunities throughout the term for teachers to use open-ended questions. The *Poster Book* is used during whole class activities and small group teacher-guided activities to encourage learners to express their own ideas and solve problems.

In Activity 7, you will discuss a poster and talk about whether the questions posed are 'open-ended' or 'closed' questions.

### Activity 7

### Facilitator's notes

- ◆ Discuss the kinds of questions that were asked in **Activity 7** and how the **guidance principle** encourages problem solving through effective questioning.
- ◆ Highlight the importance of using maths vocabulary in discussions with learners.
- ◆ Remind participants that not all learners will grasp the ideas/concepts at the same time (**level principle**) and that they should be encouraged to share their thinking and be given plenty of practical activities and opportunities to talk about shapes.

The **guidance principle** encourages teachers and learners to work together to solve problems using effective questioning.

- ◆ **Closed questions** are questions that have a limited 'yes' or 'no' response. Closed questions can be helpful in finding out what learners know, like 'Which shape is a triangle?', 'What colour is it?'
- ◆ **Open-ended questions** have more than one possible answer, stimulate thinking and encourage learners to express their own ideas when solving problems.

Not all learners will grasp these concepts or learn the maths language at the same time (**level principle**).

### Maths vocabulary

When learners investigate, and describe shapes and objects, they use everyday language like 'flat', 'smooth' and 'pointy'. Teachers can introduce maths vocabulary to replace everyday language, for example: straight lines, curved lines, corners, sides. We also talk about how long something is, how wide it is and refer to the height of something.

Refer to the pages 190–193 of the *Concept Guide* to read more about asking questions related to teaching and learning Space and Shape (Geometry) concepts. Also read page 192 for more about Space and Shape (Geometry) vocabulary in Grade R.

# Session 3: Measurement

1 hour

## Facilitator's notes

- ◆ Explain that the focus of Week 8 is on Measurement.
- ◆ Refer participants to pages 132–135 of the *Concept Guide*.
- ◆ Have participants work in groups to complete **Activity 8**. Ask one person from each group to share their ideas.

The focus of Term 1 Week 8 is Measurement: time and length.

## Term 1 Content overview: Measurement

### Activity 8

Refer to the Measurement Content Area on pages 132–135 of the *Concept Guide*.

In your group, review:

1. What concepts are covered in Term 1?

---

---

2. What are the differences between this content and the content from CAPS?

---

---

## What is measurement?

### Facilitator's notes

- ◆ Ask participants to think about what measurement is.
- ◆ PPT: Same picture as in Activity 9.
- ◆ Participants complete **Activity 9** and share what they have written.
- ◆ Brainstorm the following questions with the group:  
Who is taller?  
Who is heavier?  
Who is older?
- ◆ Explain that measurement is about finding out 'how much' there is of a something, e.g. the length of something, how much something holds (the capacity), the mass of something or how long it takes to do something (time).
- ◆ Explain that to talk about measurement you need to say what you want to measure – the attribute. Give examples of attributes: length, height, mass, capacity.
- ◆ Use the information below Activity 9 to explain standard and non-standard measuring units.
- ◆ Explain that in Grade R, learners measure informally using non-standard measuring units to measure time, length, mass and capacity or volume.

In Activity 9 we will discuss the question ‘What is measurement?’.

### Activity 9

Look at the picture below and answer the question.

Who is the biggest?

---

Measurement is about finding ‘how much’ there is of a thing, e.g.:

- ◆ the length of something
- ◆ how much something holds
- ◆ the mass of something
- ◆ how long it takes to do something.

In order to measure, we need to decide on which attribute (feature/characteristic) we want to measure, e.g. length, mass, time. We use the following words to describe the measurements: taller, heavier, older.

Eka Nghingiriko wa 9 hi ta kanela xivutiso lexi 'Xana mpimo i yini?'

## Nghingiriko wa 9

Languta xifaniso lexi nga laha hansi kutani u hlamula xivutiso lexi.

Xana i mani lokulukumba eka hinkwavo?

---

Mpimo wu hi mayelana na ku kuma leswaku 'i swingani' leswi swi nga eka xilo, xik.:

- ◆ vulehi bya xin'wana
- ◆ i swo tala kufika kwihi xi swi khomaka
- ◆ ntiko wa xin'wana
- ◆ swi teka nkarhi wo leha kufika kwihi ku endla xin'wana.

Hi xikongomelo xa ku pima, hi fanele ku teka xiboho hi mayelana na leswaku i xihlawulekisi (xivumbeko/xikombo) xihhi hi lavaka ku xi pima, xik. vulehi, ntiko, nkarhi. Hi tirhisa marito lama landzelaka ku hlamusela hi ku hlawulekisa mipimo: lehanyana, tikanyana, khalenyana.

We need to use units to measure. These can be non-standard units or standard units.

- ◆ **Non-standard measuring units** include hands, feet, crayons, pieces of string, sticks and blocks.
- ◆ **Standard measuring units** include litres, millilitres, kilograms, grams, metres, hours, minutes, etc.

In Grade R learners measure **informally** and use **non-standard measuring units** to measure time, length, mass, capacity and volume.

## Direct comparison

### Facilitator's notes

- ◆ Demonstrate how to use direct comparison and a non-standard unit of measurement. Ask eight volunteers to stand in front. Ask:  
Who is the tallest in the group? How do you know?  
Who is the shortest in the group? How do you know?  
Is anyone the same height? How do you know?  
How can we find out?
- ◆ Have the participants stand back-to-back to compare their height. Afterwards, ask participants to complete **Activity 10**.
- ◆ Discuss that by directly comparing the attribute (height) of the two people, we could find out who was taller.
- ◆ Point out that this measurement activity has been taken from Week 8 in *Activity Guide: Term 1* (pages 136–149) and that participants should refer to this activity when planning.

Measurement in Grade R includes comparing the attribute of something 'directly' with something else. For example, measuring the length of a crayon against another crayon or comparing the height of two learners standing back-to-back.

Observe the facilitator measuring a group of participants and then complete Activity 10 in your group.

### Activity 10

Refer to pages 194–207 of the *Concept Guide* to read more about Measurement and pages 136–149 of *Activity Guide: Term 1* before you answer the questions below.

Hi fanele ku tirhisa tiyuniti ku pima. Tona ti nga va ti ri tiyuniti leti nga riki ta ntolovelolo kumbe tiyuniti ta ntolovelolo.

- ◆ **Tiyuniti leti nga riki ta ntolovelolo** ti katsa swandla, mikondzo, tikhirayoni, swiphemu swa ngoti, swimhandzana na tibuloko.
- ◆ **Tiyuniti to pima ta ntolovelolo** ti katsa tilitara, timililitara, tikhilogiramu, tigramu, timitara, tiawara, timinete, sw. na sw.

Eka Giredi ya V vadyondzi va pima hi ndlela ya **nkamafundza** naswona va tirhisa **tiyuniti leti nga riki ta ntolovelolo** ku pima nkarhi, vulehi, ntiko, vundzeni na vholomu.

## Mfananiso wo kongoma

### Tinotsi ta muhumelerisi

- ◆ Kombisa hilaha ku tirhisiwaka hakona mfananiso wo kongoma na yuniti leyi nga riki ya ntolovelolo ya mpimo. Kombela nhungu wa vatinyiketeri ku yima emahlweni. Vutisa:  
Xana i mani a nga leha kutlula hinkwavo entlaweni lowu? Xana u swi tiva njhani?  
Xana i mani a nga koma kutlula hinkwavo entlaweni lowu? Xana u swi tiva njhani?  
Xana munhu wihi kumbe wihi u na vulehelahenhla byo fana? Xana u swi tiva njhani?  
Xana hi ta swi kumisisa njhani?
- ◆ Endla leswaku vatekaxiave va yima va fularhelana hi mihlana ku fananisa vulehelahenhla bya vona. Endzhaku ka swona, kombela vatekaxiave ku hetisa **Nghingiriko wa 10**.
- ◆ Kanelani leswaku hi ku fananisa hi ku kongoma xihlawulekisi (vulehelahenhla) xa vanhu vambirhi, hi nga kumisisa leswaku i mani a nga lehanyana.
- ◆ Kombeta leswaku nghingiriko lowa mpimo wu tekiwile kusuka eka Vhiki ra 8 eka *Xiletelo xa Migingiriko: Kotara ya 1* (tipheji ta 136–149) na leswaku vatekaxiave va fanele ku kongomisa eka nghingiriko lowu loko va ri karhi va kunguhata.

Mpimo eka Giredi ya V wu katsa ku fananisa xihlawulekisi xa xin'wana 'hi ku kongoma' na xin'wana xo karhi. Tanihi xikombiso, ku pima vulehi bya khirayoni na khirayoni yin'wana kumbe ku fananisa vulehelahenhla bya vadyondzi vambirhi lava nga yima va fularhelana hi mihlana.

Xiyaxiyani muhumelerisi a ri karhi a pima ntlawa wa vatekaxiave kutani mi hetisa Nghingiriko wa 10 entlaweni wa n'wina.

### Nghingiriko wa 10

Kongomisa eka tipheji ta 194–207 ta *Xiletelo xa Minongoti* ku hlaya swo tala hi mayelana na Mpimo na tipheji ta 136–149 ta *Xiletelo xa Migingiriko: Kotara ya 1* u nga si hlamula swivutiso leswi nga laha hanshi.

1. What non-standard unit of measurement was used to measure the height of the participants?

---

Learners' bodies.

2. What other non-standard units of measurement could be used to measure the height of the participants?

---

E.g. string, pencil, block.

## Time

### Facilitator's notes

- ◆ Facilitate a discussion about teaching time to learners in Grade R – that it is an abstract concept and that learners need to learn about time from daily experiences that are familiar to them.
- ◆ Ask participants to complete **Activity 11** and share their ideas with the large group. These should include:
  - sequencing of repeated events or activities during the day
  - the weather chart with day, date and month and pictures on a weekly calendar
  - the calendar with days of the week.

Time is a difficult abstract concept for learners to understand. Learners need to understand how time passes in their own lives, so teachers need to relate time to the learner's daily experiences and events that are familiar to them.

### Activity 11

Refer back to Term 1 Week 8 in *Activity Guide: Term 1* and with a partner discuss how time is taught in these lessons. Share your ideas about the following.

1. How can Grade R teachers/practitioners help learners understand more about the concepts of:
  - ◆ day and night?
  - ◆ yesterday, today and tomorrow?
  - ◆ how long things take?
  - ◆ the sequence of time?

---

---

---

---

1. Xana i yuniti yihi leyi nga riki ya ntolovelo ya mpimo yi tirhisiweke ku pima vulehelahenhla bya vatekaxiave?

---

Miri ya vadyondzi.

2. Xana i tiyuniti tihi tin'wana leti nga riki ta ntolovelo ta mpimo ti nga tirhisiwaka ku pima vulehelahenhla bya vatekaxiave?

---

Xik. ngoti, pensele, buloko.

## Nkarhi

### Tinotsi ta muhumelerisi

- ◆ Humelerisa nkanelo hi mayelana na ku dyondzisa vadyondzi nkarhi eka Giredi ya V – wolowo i nongoti wa xianakanyiwa na leswaku vadyondzi va fanele ku dyondza hi mayelana na nkarhi kusuka eka mitokoto ya siku na siku leyi va yi tivaka.
- ◆ Kombela vatekaxiave ku hetisa **Nghingiriko wa 11** kutani va avelana mianakanyo ya vona na ntlawa lowukulu. Leswi swi fanele ku katsa:
  - ku longoloxela swiendleko leswi vuyeleriweke kumbe migingiriko esikwini
  - chati ya maxelo leyi nga na vito ra siku, leswaku i tingani na n'hweti na swifaniso eka khalendara ya vhiki na vhiki
  - khalendara leyi nga na masiku ya vhiki.

Nkarhi i nongoti wa xianakanyiwa wo tika eka vadyondzi ku wu twisisa. Vadyondzi va fanele ku twisisa hilaha nkarhi wu hundzaka hakona evuton'wini bya vona vini, hikokwalaho vadyondzi va fanele ku fambelanisa nkarhi eka mitokoto na swiendleko swa siku na siku swa vadyondzi leswi swi nga toloveleka eka vona.

### Nghingiriko wa 11

Kongomisa nakambe eka Vhiki ra 8 ra Kotara ya 1 eka *Xiletelo xa Migingiriko: Kotara ya 1* kutani na mutirhisani wa wena mi kanela hilaha nkarhi wu dyondzisiwaka hakona eka tidyondzotsongo leti. Avelanani mianakanyo ya n'wina hi mayelana na leswi landzelaka.

1. Xana vadyondzisi/vatirhi va Giredi ya V va nga pfuna njhani vadyondzi ku twisisa swo tala hi mayelana na minongoti ya: nhlekanhi na vusiku?
  - ◆ tolo, namuntlha na mundzuku?
  - ◆ xana swilo swi teka nkarhi wo leha kufika kwihhi?
  - ◆ malongolokelo ya nkarhi?

2. How can you use your daily programme activities to teach learners about the concept of time?

---

---

---

Discussing the sequence of activities – e.g. what do we do first, next, what happened before Storytime – provides opportunities to reflect on what happened first/next/last.

3. What vocabulary is important to understand the concept of time?

---

---

---

Before, after, next, now, then, day, night, morning afternoon, today, yesterday, tomorrow.

Refer to pages 194–207 of the *Concept Guide* to read more about Measurement and time. Refer to the page 210 of the *Concept Guide* to read more about asking questions related to teaching and learning of Measurement in Grade R.

2. Xana u nga yi tirhisa njhani migingiriko ya wena eka nongonoko wa siku na siku ku dyondzisa hi mayelana na nongoti wa nkarhi?

---

---

---

Ku kana malongolokelo ya migingiriko – xik. xana hi swihi leswi hi swi endlaka rosungula, leswi landzelaka, xana ku humelele yini ku nga si fika Nkarhi wa xitori – swi nyika swivandlanene swa ku ehleketisisa hi mayelana na leswi humeleleke rosungula/leswi landzeleke/swo hetelela.

3. Xana i ntivomarito wihi wu nga wa nkoka eka ntwisiso wa nongoti wa nkarhi?

---

Emahlweni ka, endzhaku ka, leswi landzelaka, sweswi, endzhaku ka swona, nhlekanhi, vusiku, mixo, ndzhenga, namuntlha, tolo, mundzuku.

Kongomisa eka tipheji ta 194–207 ta *Xiletelo xa Minongoti* ku hlaya swo tala hi mayelana na Mpimo na Nkarhi. Kongomisa eka pheji ya 211 ya *Xiletelo xa Minongoti* ku haya swo tala hi mayelana na ku vutisa swivutiso leswi fambelanaka na madyondziselu na madyondzelo ya Mpimo eka Giredi ya V.

# Session 4: Numbers, Operations and Relationships

1 hour

## Facilitator's notes

- ◆ Draw the participants' attention to how the number 3 is introduced on pages 102–105 of *Activity Guide: Term 1*.
- ◆ Explain that even though the Content Area Focus is Patterns, Functions and Algebra in Week 6, the number 3 is also introduced in this week.
- ◆ Discuss the routine that is followed for the numbers 1 and 2 and reflect on whether the same routine is followed for number 3. Discuss how each number of pictures and dots is one more than the previous one and make the connection to the fact that 2 is one more than 1 and 3 is one more than 2.
- ◆ Explain that in Week 6 learners are also introduced to dot cards.
- ◆ Use the dot cards in the *Resource Kit* to demonstrate how learners match counters to the dot cards and discover that 3 is made up of 1 and 2 dots.

In Workshop 2, you were introduced to the concepts of counting and representation of number. In this workshop we will see how the same ideas continue into Week 6 as the number 3 is introduced. The same routine is followed as with numbers 1 and 2, namely:

Refer to pages 102–105 of *Activity Guide: Term 1* for the introduction of number '3' activity.

Tell the *Number 3 story* and dramatise as you build up the story with the different representations of the number using frieze cards from the *Resource Kit*:

- ◆ animal (picture)
- ◆ number symbol
- ◆ number word
- ◆ dots (representing the doorbells).

Look for objects and match the number symbol (3) and number word (three). In Week 6, learners are introduced to dot cards (from the *Resource Kit*). Learners match counters to the dot cards and discuss that 3 is made up of 1 and 2 dots.

Kanelani hilaha nomboro yin'wana na yin'wana ya swifaniso na mathonsi yi nga yikulu hi n'we kutlula leyi nga hundza kutani mi vumba vuxaka eka ntiyiso wa leswaku 2 i yikulu hi n'we eka 1 naswona 3 i yikulu hi n'we eka 2.
- ◆ Hlamusela leswaku eka Vhiki ra 6 vadyondzi va ta tlhela va tivisiwa eka makhadi ya mathonsi.
- ◆ Tirhisa makhadi ya mathonsi lama nga eka *Khiti ya Swipfuno* ku kombisa hilaha vadyondzi va pananisaka hakona swihlayeri eka makhadi ya mathonsi na ku thumba leswaku 3 yi vumbiwa hi mathonsi ya 1 na 2.

Eka Ndzetelavutivi wa 2, mi tivisile minongoti ya ku hlayela na ku endla vuyimeri bya nomboro. Eka ndzetelavutivi lowu hi ta vona hilaha mianakanyo yo fana yi yaka emahlweni hakona eka Vhiki ra 6 loko nomboro ya 3 yi ri karhi yi tivisiwa. Vadyondzi va pananisa swihlayeri eka makhadi ya mathonsi kutani va kanela leswaku 3 yi vumbiwa hi mathonsi ya 1 na 2.

## Term 1 Content overview: Numbers, Operations and Relationships

### Facilitator's notes

- ◆ Explain that the focus of Week 9 is on Numbers, Operations and Relationships.
- ◆ Refer participants to pages 114–123 of the *Concept Guide*.
- ◆ Have participants work in groups to complete **Activity 12**. Ask one person from each group to share their ideas.

Week 7 focuses on Space and Shape (Geometry) while Week 8 focuses on Measurement. The focus of Week 9 in Term 1 is once more on number concepts. In this session, you will investigate the relationship between numbers.

### Activity 12

Refer to the Numbers, Operations and Relationships content overview on pages 114–123 of the *Concept Guide*. In your group, discuss the following features of the content overview:

1. What is Topic 1.4?
2. What sub-topics are listed under this topic?
3. What are the differences between the blue and black text? Explain why you think this is so.

## Calculating

### Facilitator's notes

- ◆ Point out that learners in Grade R do not do number operations such as addition and subtraction, multiplication and division. Give an example of how these concepts are gradually built up through counting and manipulation of concrete materials and through problem solving in appropriate real-life contexts.
- ◆ Demonstrate an activity that involves breaking down and building up numbers ('Shake and break' on pages 166–169 of *Activity Guide: Term 1*).
- ◆ After the demonstration, participants complete **Activity 13**. Ask one person from each group to share their ideas.
- ◆ Discuss which of the questions asked were open-ended and which were closed questions.
- ◆ Remind participants that not all learners will demonstrate an understanding of these number concepts at the same time (**level principle**).

In Grade R learners do not do number operations like addition and subtraction, multiplication and division. These concepts are gradually built up through investigation and through problem solving. For example: *I have three apples. I eat one. How many apples do I have left?*

## Nkatsakanyo wa vundzeni wa Kotara ya 1: Tinomboro, Tioparexini na Vuxaka

### Tinotsi ta muhumelerisi

- ◆ Hlamusela leswaku nkongomo wa Vhiki ra 9 wu le ka Tinomboro, Tioparexini na Vuxaka.
- ◆ Kongomisa vatekaxiave eka tipheji ta 114–123 ta *Xiletelo xa Minongoti*.
- ◆ Endla leswaku vatekaxiave va tirha hi mitlawa ku hetisa **Nghingiriko wa 12**. Kombela munhu un'we kusuka eka ntlawa wun'wana na wun'wana ku avelana mianakanyo ya vona..

Vhiki ra 7 ri kongomisa eka Ndhawu na Xivumbeko (Jometiri) loko Vhiki ra 8 ri kongomisa eka Mpimo. Nkongomo wa Vhiki ra 9 ra Kotara ya 1 wu tlhela wu va eka minongoti ya tinomboro. Eka sexini leyi, u ta lavisisa vuxaka exikarhi ka tinomboro.

### Nghingiriko wa 12

Kongomisa eka nkatsakanyo wa vundzeni wa Tinomboro, Tioparexini na Vuxaka lowu nga eka tipheji ta 114–123 ta *Xiletelo xa Minongoti*. Entlaweni wa n'wina, kanelani swihlawulekisi leswi landzelaka swa nkatsakanyo wa vundzeni:

1. Xana Nhlokomhaka ya 1.4 i yini?
2. Xana i tinhlokomhakatsongo tihi leti ti xaxametiweke ehansi ka nhlokomhaka leyi?
3. Xana hi kwihi ku hambana exikarhi ka xitsariwa xa muhlovo wa wasi na xa muhlovo wa ntima? Hlamusela leswaku hikwalahokayini u ehleketa leswaku leswi swi tano.

## Ku khakhuleta

### Tinotsi ta muhumelerisi

- ◆ Kombeta leswaku vadyondzi eka Giredi ya V a va endli tioparexini ta tinomboro to tanihi nhlanganiso na nsuso, andziso na avanyiso. Nyika xikombiso xa hilaha minongoti leyi yi akiwaka kuya ehenhla hi katsongotsongo hi ku tirhisa ku hlayela na ku cincacinsa timatheriyali na hi ku tirhisa ku ololoxa swiphiqu eka mivangu ya vutomi bya xiviri.
- ◆ Kombisa nghingiriko lowu wu khumbaka ku tlhantlha na ku aka tinomboro ('Dludla kutani u tlhantlha' ('Dludla kutani u hangalasa') eka tipheji ta 166–169 ta *Xiletelo xa Migingiriko: Kotara ya 1*).
- ◆ Endzhaku ka nkombiso, kombela vatekaxiave ku hetisa **Nghingiriko wa 13**. Kombela munhu un'we kusuka eka ntlawa wun'wana na wun'wana ku avelana mianakanyo ya vona.
- ◆ Kanelani leswaku hi swihi swa swivutiso leswi vutisiweke swi nga na makumu yo pfuleka naswona a ku ri swivutiso swihi swo pfaleka.
- ◆ Tsundzuxa vatekaxiave leswaku a hi vadyondzi hinkwavo va nga ta kombisa ntwisiso wa minongoti leya tinomboro hi nkarhi wo fana (**nawu wa levhele**).

Eka Giredi ya V vadyondzi a va endli tioparexini ta tinomboro to tanihi nhlanganiso na nsuso, andziso na avanyiso. Minongoti leyi yi akiwa kuya ehenhla hi katsongotsongo hi ku tirhisa vulavisisi na hi ku tirhisa ku ololoxa swiphiqu. Tanihi xikombiso: *Ndzi na maapula manharhu. Ndzi dya rin'we. Xana i maapula mangani lama ndzi nga sala na wona?*

Learners need to understand the relationship between numbers. Activities that involve breaking down and building up numbers help learners to understand the relationships between numbers and the value of numbers. For example: *5 is made up of 2 and 3, 1 and 4.*

### Demonstration

Watch the demonstration of a 'shake-and-break' game and then discuss your observations in your group.

### Activity 13

Discuss the demonstration you have just watched.

1. What number concepts could the learners learn by playing this game?

---

---

Combining (adding) and separating (subtraction).

2. What questions did the facilitator use that highlighted addition and subtraction?

---

---

---

How many counters do I have in this hand? And in this hand? When I put them together how many do I have?

How did you break up your counters?

How many do you have on each lid? When you put them together how many do you have?

If you take the ones on this lid away how many will you have left?

Not all learners will demonstrate an understanding of these number concepts at the same time (**level principle**).

Vadyondzi va fanele ku twisisa vuxaka exikarhi ka tinomboro. Migingiriko leyi yi khumbaka ku tlhantlha na ku aka tinomboro yi pfuna vadyondzi ku twisisa vuxaka exikarhi ka tinomboro na nkoka wa tinomboro. Tanihi xikombiso: 5 yi vumbiwa hi 2 na 3, 1 na 4.

## Nkombiso

Hlalelani nkombiso wa ntlangu wa 'dludla kutani u hangalasa' kutani endzhaku ka swona mi kanela mixiyaxiyo ya n'wina entlaweni wa n'wina.

### Nghingiriko wa 13

Kanelani nkombiso lowu ma ha ku wu hlalelaka.

1. Xana i minongoti yihi ya tinomboro vadyondzi va nga yi dyondzaka hi ku tlanga ntlangu lowu?

---

---

Ku katsanisa (ku hlanganisa) na ku hambanisa (ku susa).

2. Xana hi swihi swivutiso leswi muhumelerisi a swi tirhiseke leswi swi kombisaka nhlanganiso na nsuso?

---

---

---

Xana ndzi na swihlayeri swingani exandleni lexi? Kasi eka xandla lexi ke? Loko ndzi swi katsa ndhawu yin'we xana ndzi na swingani?

Xana u swi tlhantlhile njhani swihlayeri swa wena?

Xana u na swingani eka xipfalo xin'wana na xin'wana? Loko u swi katsa endhawini yin'we xana u na swingani?

Loko u susa leswi nga exipfalwini lexi xana u ta sala na swingani?

A hi vadyondzi hinkwavo va nga ta kombisa ntwisiso wa minongoti leya tinomboro hi nkarhi wo fana (**nawu wa levhele**).

## Activity Guide: Term 1: Weeks 6, 7, 8 and 9

Refer to Weeks 6, 7, 8 and 9 in *Activity Guide: Term 1*. Complete Activity 15 in your group.

### Activity 15

Find Weeks 6, 7, 8 and 9 in *Activity Guide: Term 1*. Answer the questions.

1. What is the Content Area Focus for each week?
2. What topics and new knowledge are taught in each week?
3. How does the 'Practise' content link to the previous week?
4. What do you need to get ready before teaching each week?
5. Read the whole class activities and small group activities.
6. Discuss in your small group how you will plan and organise your class for these four weeks of teaching.

Remember that in Grade R assessment is informal and continuous. We need to observe learners throughout the day, inside and outside the classroom. The eye icon reminds us that we need to observe the learners while they are busy, and we need to listen carefully while they are talking to us and to their peers.

The Maths Programme is designed around the rotation of small groups during a week and the teacher pays special attention to one group a day, watching and listening as the learners complete specific tasks. This time gives the teacher the opportunity to carefully observe each learner and gather information on their progress.

Look at the shaded block at the end of the teacher-guided activity: '**Check that learners are able to**'. The teacher makes a mental note of each learner and once the learners have left for the day she writes down her observations in a dedicated observation book that has space for each learner's notes.

## Closing activities

### Facilitator's notes

- ◆ **Lessons learnt:** Ask participants to think about what they have learnt during the workshop and to complete **Activity 16** individually.
- ◆ **Take back to school task:** Read through this task. Ask if there is anything that is not clear and that requires more explanation.
- ◆ **Evaluation:** Hand out copies of the Workshop Evaluation Form and have participants complete the form.
- ◆ **Next workshop:** Give dates for the next workshop and close the workshop.
