Overview

Purpose

This is the fourth of twelve Grade R Mathematics Improvement Programme workshops, which form part of the Gauteng Department of Education (GDE) Grade R Mathematics and Language Improvement Project.

The purpose of this workshop is to assist teachers to implement the Maths Programme in their classrooms. Participants will have the opportunity to reflect on their observations and explore how the **level principle** informs planning, teaching and learning. Participants will also consider the **level principle** and how to respond to learners with individual developmental and learning needs. The sessions will provide additional knowledge and understanding of teaching and learning in the Content Areas covered in Week 10 of Term 1, and Weeks 1–3 of Term 2.

References to the Grade R Mathematics Content Areas are taken from the *Curriculum and Assessment Policy Statement (CAPS): Grade R Mathematics (Final Draft)*, 2011, Department of Basic Education, South Africa.

Opening and reflection

1 hour

Reflect on the implementation of the Maths Programme in your daily programme and complete the following activity in your group.

Activity 1

Discuss your progress in implementing the *Take back to school* task from Workshop 3.

Refer to the observation check boxes at the end of each week in *Activity Guide: Term 1*, Weeks 6, 7, 8 and 9.

1. What insights did you gain while observing learners during their Mathematics focus time?

2. What did you find difficult about the observation during the teacher-guided activity?

3. Mention one new thing that is working well with your implementation of Term 1 Weeks 6–9. Have you found that the Maths Programme is assisting with teaching and learning in your Grade R class?

According to the **level principle**, differentiation means that what you teach and how you teach it needs to take into account the different abilities or developmental levels of your learners. To use this approach, you need to continuously observe and record each learner's progress and development in maths.

Session 1: Data Handling

1 hour

This workshop focuses on teaching the following Maths Programme content: Term 1 Week 10 and Term 2 Weeks 1–3. This session focuses on Term 1 Week 10: Data Handling.

Term 1 Content overview: Data Handling

Refer to the Data Handling Content Area on pages 136–137 of the *Concept Guide*.

Activity 2

In your group, discuss:

1. What Data Handling content is covered in Term 1?

2. What does the Maths Programme add to the content from CAPS?

Working with data

In this session, you will learn about the Data Handling cycle as a process for solving problems. Data Handling in Grade R focuses on collecting, sorting, organising, representing and analysing information about people or things. The main reason we collect data is to answer a question or to solve a problem.

Iseshini 1: Kusebenta Ngedatha

1 li-awa

Lomhlanganosikolo ugcile ekufundziseni naku lokulandzelako lokucuketfwe Luhlelo Lwetibalo: Ithemu 1 Liviki 10 neThemu 2 Emaviki 1–3. Leseshini igcile kuThemu 1 Liviki 10: Kusebenta Ngedatha.

Ithemu 1 Sibutsetelo salokucuketfwe: Kusebenta Ngedatha

Fundza Inkundla Yalokucuketfwe yeKusebenta Ngedatha kumakhasi 136–137 eNkhombandlela *Yemcondvo*.

Umsebenti 2

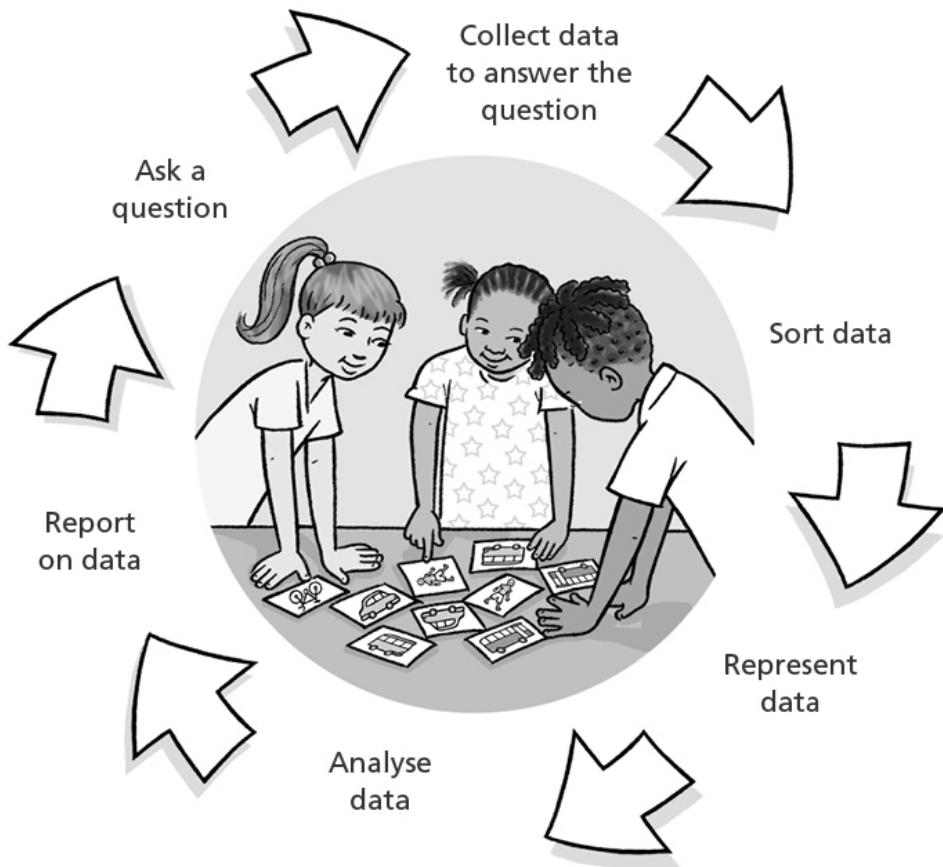

Ecenjini lakho, khulumisanani:

1. Ngukuphi lokucuketfwe Kusebenta Ngedatha lokufundziswe kuThemu 1.

2. Yini leyengetwa Luhlelo Lwetibalo kulokutsetfwe ku-CAPS?

Kusebenta ngedatha

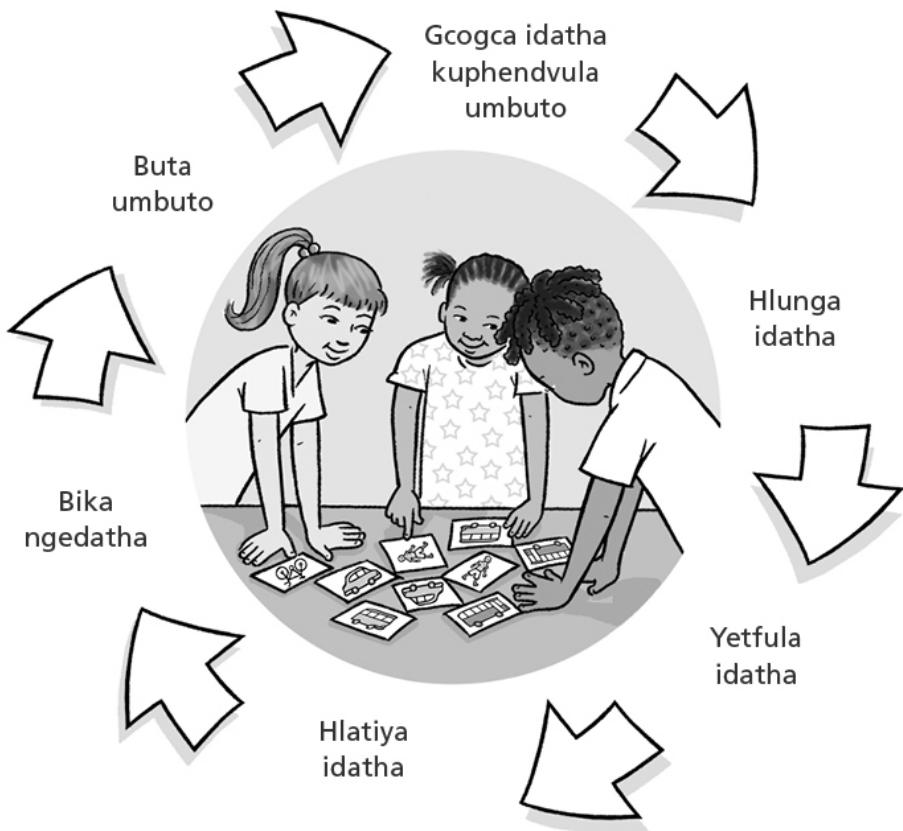

Kuleseshini, utawulalela mayelana neMjikeleto Wekusebenta Ngedatha njengenchubo yekusombulula tinkinga. Kusebenta Ngedatha kuLibanga R kugcila ekugcogceni, kuhlunga, kuhlela, kukhombisa kanye nekuhlatiya lwatiso mayelana nebantu noma tintfo. Sizatfu lesikhulu sekutsi sigcogce idatha kuphendvula umbuto noma kusombulula inkinga.

People often refer to the process of Data Handling as a cycle because the events or activities that are involved are repeated in the same sequence for each new question that is to be answered.

1. **Ask a question:** Learners decide what they want to find out about. This is the reason for collecting specific data or information.
2. **Collect data:** Learners decide they want to collect data based on the question or problem.
3. **Sort data:** Learners organise and sort data into groups according to the attribute. In order to answer questions and decide how to represent data that have been collected, decisions need to be made about how things could be sorted.
4. **Represent data:** Learners explore different ways of showing or displaying the information they have collected.
5. **Analyse data:** Learners describe and compare the data that is represented.
6. **Report on data:** Learners answer the question that was initially asked.

Objects can be sorted and classified (grouped) according to their similarities, such as colour, animals, plants. The more learners know about the properties of objects, and their similarities and differences, the more they are able to form different classification groups.

Bantfu bavamise kubita lenchubo yeKusebentisa Ngedatha ngekutsi ngumjikeleto ngoba letehlakalo noma lemisebenti lebandzakanyekako iyaphindzekwa ngekulandzelelana ngalokufanako kulowo mbuto lomusha lophendvulwako.

1. **Buta umbuto:** Bafundzi bayancuma kutsi yini loko labafuna kutfola ngako. Lesi ngiso sizatfu sekugcogca idatha noma lwatiso lolutsite.
2. **Gcogca idatha:** Bafundzi bayatincumela kutsi bafuna kuyigcogca njani idatha basukela embutweni noma sibalo.
3. **Hlunga idatha:** Bafundzi bahlela futsi bahlunge ledatha ngemacembu ngekuya kwe-athribhiyuthi. Kute baphendvule imibuto futsi bancume kutsi batayetfula njani idatha labayigcogcile, tincumo kudzinga tentiwe ngekutsi tintfo titawuhlungwa njani.
4. **Yetfula idatha:** Bafundzi behlwaya tindlela letehlukene tekukhombisa noma idatha labayigcogcile.
5. **Hlatiya idatha:** Bafundzi bachaza futsi bacatsanise ledatha leyetfuliwe.
6. **Umbiko ngedatha:** Bafundzi baphendvula lombuto lowabutwa ekucaleni.

Ema-objekthi angahlungwa futsi ahlelwe (ngemacembu) ngekwekfana kwavo, njengembala, tilwane, titjalo. Uma bafundzi bati kabanti ngetimphawu nebunjalo bema-objekthi, kanye nekufana nekwehlukana kwavo, ngulapho batawukhona kwakha tinhlelo letehlukene temacembu.

Video 1

Watch the video of the class creating and analysing a pictograph to represent the weather.

Discuss how the teacher presents each of the steps in the lesson. Notice the types of questions she uses and how she reinforces the use of correct vocabulary.

This next activity will take you through the six stages of the Data Handling cycle.

Activity 3

Take the following animal counters from the Maths Programme *Resource Kit*: three ducks, two chickens and one horse.

1. Consider this question: Are there more ducks or more chickens in the group?
2. Sort and collect data: Organise your animals into groups and then discuss the following with a partner:
 - ◆ Can you see if there are more ducks than chickens now?
 - ◆ How can you check?
3. Represent data: Turn to the grid on page 16. Place animals of the same kind one above the other in a column starting at the bottom of the grid.
4. Analyse and report on data: Look at your columns and discuss with a partner:
 - ◆ Are there more ducks or more chickens? How do you know?
 - ◆ Which column has more animals?
 - ◆ Which column has fewer animals?
 - ◆ Are there the same number of any kind of animal?

Refer to pages 184–187 of *Activity Guide: Term 1* and discuss how this activity is introduced to learners. Refer to pages 212–219 of the *Concept Guide* to read more about Data Handling. Notice the appropriate questions and vocabulary related to the teaching and learning of Data Handling in Grade R.

- Go back to Activity 4 and highlight or circle the concepts covered.

Understanding numbers

In Term 1, the numbers 1, 2 and 3 were taught. You used the same routine for each number taught, adding one more to the number each time a new number was introduced. In Term 2 Week 1, the focus is on the concept of number again. Learners are introduced to the number 4, using the same routine as for numbers 1, 2 and 3.

Activity 6

Refer to the whole class activities that focus on number 4 in Week 1: *Activity Guide: Term 2*: page 24 (Day 1 #4), page 26 (Day 2 #5), page 28 (Day 3 #4), page 30 (Day 4 #4 and Day 5 #4).

- Discuss how the number ‘4’ is introduced.

- Think about your own classroom practice and how this routine has been working so far. Complete the table.

Maths vocabulary

Part of learning new concepts involves new language. Learners need the vocabulary to talk and think about maths concepts (**interaction principle**). You can encourage learners to use maths vocabulary by using it yourself when you speak to them about maths concepts and by rephrasing what they say into maths language.

Money

In Term 2 Week 2 learners are introduced to money. Learners in Grade R are developing an awareness about the features of money and they need opportunities to explore what real South African coins look like.

Activity 7 focuses on helping learners to recognise the similarities and differences between coins: their size, shape and the animals on the coins.

Activity 7

1. What questions could you ask learners to help them recognise the different features of these coins?

2. What new vocabulary will you introduce?

Learners first need to be able to identify and name coins before they are ready to understand their value.

Silulumagama seTibalo

Incenye yekufundza imicondvo ifaka ekhatsi lulwimi lolusha. Bafundzi badzinga silulumagama kukhuluma nekucabanga ngemicondvo yetibalo (**umtsetfosimiso wekukhulumisana**). Ungakhutsata bafundzi kutsi basebentise silulumagama setibalo ngekutsi usisebentise wena ngekwakho uma ukhuluma nabo mayelana nemicondvo yetibalo nekutsi ubeke kabusha labakushoko ngelulwimi lwetibalo.

Imali

KuThemu 2 Liviki 2 bafundzi bangeniswa kusifundvo semali. Bafundzi kuLibanga R batfutfukisa kucaphela timphawukubukeka temali futsi badzinga emtfuba ekwehlwaya kutsi tinhlavumali taseNingizimu Afrika tibukeka kanjani kahlelle.

Umsebenti 7 ugcila ekusiteni bafundzi babone kufana nemehluko emkhatsini wetinhlavumali: bukhulu bato, bobunjwa bato kanye netilwane letikuto.

Umsebenti 7

1. Nguyiphi imibuto longayibuta bafundzi kubasita kutsi batibone letimphawukubukeka taletinhlavumali?

2. Ngusiphi silulumagama lesisha lotasetfula?

Bafundzi bafanele kutsi bacale ngekwati kukhomba nekusho emagama etinhlavumali ngembikwekutsi bavisise bungako bato.

Learners need to be exposed to the purpose of money. Teachers can help learners understand that money is used to buy things like food and clothes and to do different things like travelling by taxi or bus. Expose learners to money and its purpose by setting up a play-shop with pretend coins and notes and items that can be bought.

Refer to the whole class activities and small group activities that focus on money on pages 40–51 of *Activity Guide: Term 2*. In your group, complete Activity 8.

Activity 8

1. What money concepts are being taught and learnt in the whole class activities?

2. How are learners encouraged to explore the purpose of money?

3. How does the teacher consolidate this new knowledge in the small group activities?

Bafundzi bafanele kutsi bavuleleke kutinhloso temali. Bothishela bangasita bafundzi bavisise kutsi imali isetjentiselwa kutsenga tintfo letifanana nekudla netimphahla tekugcoka kanye nekwenta letinye tintfo letehlukene njengetuhamba ngetekisi noma ibhasi. Yenta bafundzi bavuleleke ekwatini sizatfu sebukhona kwemali nekutsi wente sitolo sekudlala kusetjentiswe tinhlavumali nemaphephamaali ekulingisa noma ekudlala kanye netintfo letitsengwako.

The focus of Term 2 Week 3 is Space and Shape (Geometry).

Term 2 Content overview: Space and Shape (Geometry)

Refer to pages 126–131 of the *Concept Guide*.

Activity 9

1. What Space and Shape (Geometry) concepts are covered in Term 2?

2. What does the Maths Programme add to the content of CAPS?

Triangles

In Term 2 Week 3, learners continue their exploration of two-dimensional shapes as they describe, sort and compare them. In this session you will deepen your understanding of the properties of triangles.

Refer to Day 2 #4 on page 58 of *Activity Guide: Term 2* and then complete Activity 10 in your group.

When learners are given opportunities to sort and group different shapes, they need to focus on the properties of the shapes to make their decisions, e.g. the number of sides, whether the sides are straight or curved and the number of corners.

Stories are a great way to introduce shape concepts to learners. Listen to the story, *They pulled and they pulled*, from Week 3 (*Activity Guide: Term 2*, pages 62 and 198) as told by your facilitator and then complete Activity 11 in your group.

Activity 11

1. What questions could you ask learners to help them learn more about the properties of triangles?

2. Are most of these questions open-ended or closed questions?

Note: Use *Activity Guide: Term 1* and *Term 2* to help you plan for teaching these weeks. The ideas and activity suggestions are a guide and resource. Set up the maths area with the content focus for each week.
